

# Study Guide And Intervention Substitution Answer Key

As recognized, adventure as without difficulty as experience just about lesson, amusement, as skillfully as concurrence can be gotten by just checking out a book Study Guide And Intervention Substitution Answer Key plus it is not directly done, you could understand even more on the order of this life, approaching the world.

We allow you this proper as capably as simple way to get those all. We allow Study Guide And Intervention Substitution Answer Key and numerous book collections from fictions to scientific research in any way. in the middle of them is this Study Guide And Intervention Substitution Answer Key that can be your partner.

## Study Guide And Intervention Substitution Answer Key

Get Free Study Guide And Intervention Substitution Study Guide and Intervention Substitution Solve by Substitution One method of solving systems of equations is substitution. Use substitution to solve the system of equations.  $y = 2x$   $4x - y = -4$  Substitute  $2x$  for  $y$  in the second equation.  $4x - y = -4$  Second equation  $4x - 2x = -4$   $y = 2x$   $2x = -4$  Combine like terms.  $x = -2$

Solve Real-World Problems Substitution can also be used to solve real-world problems involving systems How many gallons of each solution are needed? 3. GEOMETRY The perimeter of a triangle is 24 inches. Chapter 6.

*Study Guide And Intervention Substitution*

6-1 Study Guide and Intervention Graphing Systems of Equations Possible Number of Solutions Two or more linear equations involving the same variables form a system of equations. A solution of the system of equations is an ordered pair of numbers that satisfies both equations. The table below summarizes information about systems of linear equations.

*Study Guide And Intervention Substitution*

Substitute the expression  $2x + 9$  for  $y$  into the second equation and solve for  $x$ .  $x + y = 6$  Second equation  $x + 3 = 6$  Substitute  $2x + 9$  for  $y$ .  $6 + 27 = 6$  Distributive Property  $7 + 6$

Simplify.  $7 + 21 = 28$  Add 27 to each side.  $3 = 28 - 7$  Divide each side by 7. Now, substitute the value 3 for  $x$  in either original equation and solve for  $y$ .  $4 + 9 = 13$  First equation  $2(3) + 9 = 13$

Replace  $x$  with 3.  $6 + y = 13$  Simplify.  $y = 13 - 6$
