The Coming Jobs War Chapman and Hall/CRC

"Roger Lucey's life journey was changed radically by events that he only found out about 15 years down the line. By that time there was no returning to the original plan. Roger Lucey was and is a troubadour, a singer and a songwriter who reflects, through song, the world he lives in. Late 70's South Africa was a cruel and violent place and Lucey's songs quickly drew the unwanted attention of the State and security police, among them Paul Erasmus. A covert operation shut down Lucey's music career and our troubadour had to look in other directions in search of a livelihood. Back in from the Anger tells the story of a once-promising young musician who became a barman, roadie, sound technician, news cameraman and many other things as he waded through life always trying to find the voice that he had lost. It is a story that at times stretches the imagination, often reminding us of the hard road this country has come, but it is always told with humanity and humour."--Back cover.

Best known as the divisive but iconic frontman of The Mission and a poster boy for the-then fledgling gothic scene of the 80s, Wayne Hussey has been making music since he was inspired to pick up a guitar by his childhood hero, Marc Bolan. As he began making his name in music with The Invisible Girls, Dead Or Alive and The Sisters Of Mercy, Wayne was at first seduced and then ultimately corrupted, swapping the repression of his religious upbringing for its polar opposite: a lifestyle of total hedonism. From his early days raised as a Mormon to being schooled in gender bending by Pete Burns, from his move to Liverpool in the late Seventies to his remaining fanaticism with Liverpool FC, Salad Daze is an all-encompassing account of Wayne's personal and musical journey up until the formation of The Mission. Salad Daze is an unflinchingly honest portrayal of the peaks and pitfalls of a life in the music industry, told with plenty of Wayne's wit and charm qualities that helped him survive his own unrestrained ambitions to still be making music today.

They were two of the most explosive dancers of the twentieth century, dazzling audiences with daredevil splits, slides, and hair-raising flips. But they were also highly sophisticated dancers, refining a centuries-old tradition of percussive dance into the rhythmic brilliance of jazz tap at its zenith. They were Fayard and Harold Nicholas, two American masters masterfully portrayed in this new dual biography by Constance Valis Hill. In Brotherhood in Rhythm, Hill interweaves an intimate portrait of these great performers with a richly detailed history of jazz music and jazz dance, both bringing their act to life and explaining their significance through a colorful analysis of their eloquent footwork, their full-bodied expressiveness, and their changing style.

Definitive leadership strategy for fixing the American economy, drawn from Gallup 's unmatched global polling and written by the company 's chairman. What everyone in the world wants is a good job. " This is one of the most important discoveries Gallup has ever made," says the company 's Chairman, Jim Clifton. In The Coming Jobs War, Clifton makes the bold assertion that job creation and successful entrepreneurship are the world 's most pressing issues right now, outpacing runaway government spending, environmental degradation and even the threat of global terrorism. The book is grounded in findings from Gallup 's World Poll, which reveals the implications of the jobs war on everything from economics to foreign policy to nothing less than America 's moral authority in the world. And it offers a prescription for attacking the jobs issue head-on. Clifton argues that the solution to creating good jobs must be found in cities, not in the federal government. Promoting entrepreneurship and job creation must be the sole mission and purpose of cities ' business leaders, government officials and philanthropists. Clifton says that the next big breakthrough will come from the combination of the forces within big cities, great universities and powerful local leaders. Their combined effect is the most reliable, controllable and predictable solution to America 's biggest problem. Strong leadership teams and a natural order are already in place within cities — in governments and local business and philanthropic entities, with caring leaders working on initiatives to fuel local economic growth and to create good jobs. The feat these leaders have to pull off is doubling their entrepreneurial energy by aligning their local forces: local tribal leaders, super mentors and universities. Winning the jobs war will require all hands on deck, and failure is not an option, especially for the United States, which has been the global leader in promoting freedom and entrepreneurship. America 's place in the world is at stake, and there are other countries poised to surpass a sputtering U.S. economy that is currently growing at only 2% annually. The biggest threat? China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world 's leading and most influential economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America 's ability to win the jobs war because America has been here before. " The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again," he says. The Coming Jobs War offers a clear, brutally honest look at America 's biggest problem and a cogent prescription for solving it.

This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval periods. Drawing on the latest archaeological evidence and historical studies, the book examines the chronological development and technical

details of handmills, beast mills, watermills and windmills from the first millennium BCE to c. 1500. It discusses the many and varied uses to which mills were turned in the civilisations of Rome, China, Islam and Europe, and the many types of mill that existed. The book also includes comparative regional studies of the social and economic significance of milling, and tackles several important historiographical issues, such as whether technological stagnation was a characteristic of late Antiquity, whether there was an industrial revolution" in the European Middle Ages based on waterpower, and how contemporary studies in the social shaping of technology can shed light on the study of pre-modern technology."
