Filipino Americans are one of the three largest Asian American groups in the United States and the second largest immigrant population in the country. Yet within the field of Asian American Studies,

Filipino American history and culture have received comparatively less attention than have other ethnic groups. Over the past twenty years, however, Filipino American scholars across various disciplines have published numerous books and research articles, as a way of addressing their unique concerns and experiences as an ethnic group. The SAGE Encyclopedia of Filipina/x/o American Studies, the first on the topic of Filipino American Studies, offers a comprehensive survey of an emerging field, focusing on the Filipino diaspora in the United States as well as highlighting

Islands and their status in international law have become one of the more contentious issues in public international law. However, despite this, there is no contemporary book-length study on the question. This book fills that gap.

Written by one of

public international lawyers, it offers an authoritative overview of how public international law operates in relation to islands. Key issues such as artificial islands, archipelagos, sovereignty, territorial rights, maritime entitlements, and governance are explored in depth. This will become a classic text in the field of international law.

This book constitutes the refereed post-conference proceedings of the Second EAI International Conference on Sustainable Energy for Smart Cities, SESC 2020, held in Portugal in December 2020. The conference was framed within the 6th Annual Smart City 360° Summit. Due to COVID-19 pandemic the conferences were held virtually. The 13 revised full papers were carefully reviewed and selected from 27 submissions. They present multidisciplinary scientific results toward answering the complex technological problems of emergent Smart Cities. The subjects related to sustainable energy,

framed with the scope of smart cities and addressed along with the SESC 2020 conference, are crucial to guarantee an equilibrium among economic growth and environmental sustainability, as well as to contribute to reducing the impact of climate change.
