The nation's premier communications expert shares his wisdom on how the words we choose can change the course of business, of politics, and of life in this country
In *Words That Work*, Luntz offers a behind-

the-scenes look at how the tactical use of words and phrases affects what we buy, who we vote for, and even what we believe in. With chapters like "The Ten Rules of Successful Communication" and "The 21 Words and Phrases for the 21st Century," he examines how choosing the right words is essential. Nobody is in a better position to explain than Frank Luntz: He has used his knowledge of words to help more than two dozen Fortune 500 companies grow. Hell tell us why Rupert Murdoch's six-billion-dollar decision to buy DirectTV was smart because satellite was more cutting edge than "digital cable," and why pharmaceutical

companies transitioned their message from "treatment" to "prevention" and "wellness." If you ever wanted to learn how to talk your way out of a traffic ticket or talk your way into a raise, this book's for you.

Case Studies from an International Perspective
Cambridge University Press
This book provides teachers with an entirely new approach to developing and using classroom-based language assessments. This approach is based on current theory and practice in the field of language assessment and on an understanding of the assessment needs of classroom teachers. The following key questions are addressed: • Why do I need to assess? What beneficial consequences do I want to help bring about? How can my assessments help my students learn better and help me improve my teaching? • When and how often do I need to assess? What decisions do I need to make to help bring about these beneficial consequences? • What do I need to assess? How can I define the abilities that I want to assess? • How can I assess my students? What kinds of assessment tasks should I create? How can I score my

students' responses to these tasks? The authors guide the reader step-by-step through the process of developing and using classroom-based assessments with clear explanations and definitions of key terms, illustrative examples, and activities for applying the approach in practice. By All Means

Communicate Springer

For use in courses on language teaching methodology and teacher preparation, this book also serves as an invaluable source for courses in language curriculum development, materials development, and teaching practice. The author views effective language teaching as a network of interactions involving the curriculum, methodology, the teacher, the learner, and instructional materials (hence the metaphor of a matrix). Each chapter discusses and examines the theoretical and practical dimensions of a central issue in language teaching. Among the topics covered are curriculum development, designing instructional

materials, teaching listening, speaking, reading and writing, the nature of effective teaching, self-monitoring in teacher development, and language and content. Richards presents key issues in an accessible and highly readable style, and shows how teachers and teachers-in-training can be involved in the investigation of classroom teaching and learning. The emphasis is not on prescriptions but rather on developing effective teaching through understanding the various factors that interact in second language learning and in the second language classroom.

As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing.

Second Language Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. Second Language Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.
