Digital technology covers digital information in every form. The world lives in an information age in which massive amounts of data are being produced to improve our daily lives. This intelligent digital network incorporates interconnected people, robots, gadgets, content, and services all determined by digital transformation. The role of digital technologies in children's, adolescent's, and young adult's lives is significantly increasing across the world. New and emerging devices and services promise to make their lives easier as they create new ways of connecting, creating, and relaxing. They also promise to support learning at home and school by enabling ready access to information and new and exciting pathways for young people to follow their interests. Yet, alongside these conveniences come trade-offs with implications for privacy, safety, health, and well-being. *Impact and Role of Digital Technologies in Adolescent Lives* provides a deeper understanding of how digital technologies impact the lives of children, adolescents, and young adults; this includes the navigation of developmental tasks and the issues faced when utilizing these technologies. Covering topics such as adolescent stress, cyberbullying, intellectual disabilities, mental health, obesity, social media, and mindfulness practices, this text is essential for sociologists, psychologists, media analysts,

technologists, academicians, researchers, students, non-government and government organizations, and professors.

2014 International Conference on Education and Management Science (ICEMS2014) will be held in Beijing, China on August 19 – 20, 2014. The main purpose of this conference is to provide a common forum for researchers, scientists, and students from all over the world to present their recent findings, ideas, developments and application in the border areas of Education and Management Science. It will also report progress and development of methodologies, technologies, planning and implementation, tools and standards in information systems. Education is an internal topic. It is a process of delivering knowledge in a basic meaning. Humans are hard to define the actual definition of education. But it is the key point for our society to step forward. Management science is the discipline that adapts the scientific approach for problem solving to help managers making informed decisions. The goal of

management science is to recommend the course of action that is expected to yield the best outcome with what is available.

TARGET SNAP 2018 (Past Papers 2005 - 2017) + 5 Mock Tests 10th Edition Oswaal Books and Learning Private Limited

The education of young people is context bound. This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.
