The Sun and stars rotate in di?erent ways and at di?erent velocity rates. The knowledge of how they rotate is important in understanding the formation and evolution of stars and their structure. The closest star to our Earth, the Sun, is a good laboratory to study in detail the rotation of a G star and allows to test new ideas and develop new techniques to study stellar rotation. More or less massive, more or lessevolved objects, however, can have averydi?erent rotation rate, structure and history. In recent years our understanding of the rotation of the Sun has greatly improved. The Sun has a well-known large-scale rotation, which can be m- sured thanks to visible features across the solar disk, such as sunspots, or via spectroscopy. In addition, several studies cast light on di?erential rotation in the convective zone and on meridional circulation in the radiative zone of the Sun. Even the rotation of the core of the Sun can now be studied thanks to various methods, such as dynamics of the gravitational moments and of course, helioseismology, through g-modes analysis. Moreover, the magnetic ?eld is strongly linked to the matter motions in the solar plasma. The solar magnetic ?eld can be measured only at the surface or in theupperlayers. Itistheproductoftheinternaldynamoorofthelocaldynamos if they exist – in any case magnetic ?eld and rotation cannot thus be separated.

A Raisin in the Sun Springer
In south side Chicago, Walter Lee, a black chauffeur, dreams of a better life, and hopes to use his father's life insurance money to open a liquor store. His mother, who rejects the liquor business, uses some of the money to secure a proper house for the family. Mr Lindner, a representative of the all-white neighbourhood, tries to buy them out. Walter sinks the rest of the money into his business scheme, only to have it stolen by one of his partners. In despair Walter contacts Lindner, and almost begs to buy them out, but with the help of his wife, Walter finally finds a way to assert his dignity. Deeply committed to the black struggle for equality and human rights, Lorraine Hansberry's brilliant career as a writer was cut short by her death when she was only 35. *A Raisin in the Sun* was the first play written by a black woman to be produced on Broadway and won the New York Drama Critics Circle Award. Hansberry was the youngest and the first black writer to receive this award.

There are more than a hundred names for God used in the Bible. And each of them reveals something essential about his nature and character. In this six-session video Bible study (streaming code included), the authors of The Rock, The Road, and the Rabbi Kathie Lee Gifford and Rabbi Jason Sobel explore the meaning and importance of six different attributes of God—his creativity, his wisdom, his mercy, his power, his radiance, and his inclusivity of all people. The God of His Word (part 2 of The God of the Way Study Series) will help you understand these attributes and how they apply to your life in a way that will change your faith and the way you think. Each session includes clips from The Way that brings the story of Scripture to life with contemporary orchestral arrangements, powerful narration and visuals.
Sessions and video run times: God of Creation (20:00) God of Mercy (19:30) God of Power (19:00) God of Wisdom (20:00) God of Light (21:00) God of All People (21:00) This study guide has everything you need for a full Bible study experience, including: The study guide itself—with discussion and reflection questions, video notes, and a leader's guide. An individual access code to stream all video sessions online (DVD also available separately). Streaming video access code included. Access code subject to expiration after 12/31/2028. Kids ask the darndest things . . . and here are the answers—all in one helpful book! Anyone who has ever been a kid, raised a kid, or spent any time with kids knows that asking questions is a critical part of growing up. Kids have curious minds and they come up with some very interesting questions. But the truth is adults don't always know the answers. The Handy Answer Book for Kids (and Parents) comes to the rescue. Written with a child's imagination in mind, this easy-to-understand book is a launching pad for curious young minds and a life raft for parents at wit's end. It addresses nearly 800 queries with enough depth and detail to both satisfy the curiosity of persistent young inquisitors and provide parents with

a secure sense of a job well done. It'll equip every parent for those difficult, absurd, or sometimes funny questions from their kids, such as Is there life on Mars? Do rivers ever dry up? Why are there wars? Is there such a thing as a funny bone? Why do dogs bark? Why is the sky blue? Why do people have to grow old? Why do people speak different languages? The Sun Visible Ink Press
