The Christian Writer's Manual of Style is an essential tool not only for writers of religious materials, but for their editors, proofreaders, designers, copywriters, production managers, and even marketers. Rather than simply repeating style information commonly available in standard references, this newly updated and expanded edition includes points of grammar, punctuation, usage, book production and design, and written style that are often overlooked in other manuals. It focuses on information relating to the unique needs and demands of religious publications, such as discussions on how to correctly quote the Bible, how to capitalize and use common religious terms, and how to abbreviate the books of the Bible and other religious words. Also included are rarely found items such as: • an author's guide to obtaining permissions • guidelines for using American, British, and Mid-Atlantic styles • discussions of inclusive language, profanity, and ethnic sensitivities • discussions of Internet and computer-related language style • a list of problem words • style issues regarding words from major world religions • a discussion of handling brand names in text • a list of common interjections • issues of type design, paper, copy-fit This edition has been completely updated since the 1988 edition and contains more than twice as much information as the previous edition. This is the most detailed and comprehensive guide of its kind.

Think of the last great article you read or the last great speech you heard. Chances are, if you remember one key message, you also remember one compelling story. That's because the best content starts with a story. When it comes to marketing, the best business content starts with a story the audience cares about, not the brand's message about what it wants to sell them. In Brand, Meet Story, Heather Pemberton Levy describes the Story Comes First method, a practical approach that combines techniques from journalism and fiction writing to help brands tell stories that put the readers' interests first. Whereas most brand marketers create content to sell their product, service or technology, the Story Comes First method turns this approach on its head to create content with the "human moments" that truly engage an audience. Filled with examples from Levy's experience creating content marketing programs, trade books, and hundreds of articles for a variety of B2B and B2C brands, the book shows readers a step-by-step approach to create content designed to deliver business results. Brand, Meet Story explains the key ways to uncover what your audience cares about and how to turn brand messaging into stories that matter. Levy inspires readers to develop a compelling voice that will carry the brand tone and values across all channels, and helps them turn their ideas into engaging, story-driven content their audiences will read, love, and share.

The Global English Style Guide illustrates how much you can do to make written texts more suitable for a global audience. Accompanied by an abundance of clearly explained examples, the Global English guidelines show you how to write documentation that is optimized for non-native speakers of English, translators, and even machine-translation software, as well as for native speakers of English. You'll find dozens of guidelines that you won't find in any other source, along with thorough explanations of why each guideline is useful. Author John Kohl also includes revision strategies, as well as caveats that will help you avoid applying guidelines incorrectly. Focusing primarily on sentence-level stylistic issues, problematic grammatical constructions, and terminology issues, this book

addresses the following topics: ways to simplify your writing style and make it consistent; ambiguities that most writers and editors are not aware of, and how to eliminate those ambiguities; how to make your sentence structure more explicit so that your sentences are easier for native and non-native speakers to read and understand; punctuation and capitalization guidelines that improve readability and make translation more efficient; and how language technologies such as controlled-authoring software can facilitate the adoption of Global English as a corporate standard. This text is intended for anyone who uses written English to communicate technical information to a global audience. Technical writers, technical editors, science writers, and training instructors are just a few of the professions for which this book is essential reading.
