Over the past few years, Hardwick, Vermont, a typical hardscrabble farming community of 3,000 residents, has jump-started its economy and redefined its self-image through a local, self-sustaining food system unlike anything else in America. Even as the recent financial downturn threatens to cripple small businesses and privately owned farms, a stunning number of food-based businesses have grown in the region. The Town

That Food Saved is rich with appealing, colorful characters, from the optimistic upstarts creating a new agricultural model to the long-established farmers wary of the rapid change in the region. Hewitt, a journalist and Vermonter, delves deeply into the repercussions of this groundbreaking approach to growing food, both its astounding successes and potential limitations. The captivating story of an unassuming community and its extraordinary determination to build a vibrant local food system, The Town That Food Saved is grounded in ideas that will revolutionize the way we eat and, quite possibly, the way we live.

Ranging from Plato in antiquity to Martha Nussbaum in the present era, the authors

of the seventy readings included in The Liberal Arts Tradition present significant and exemplary views addressing liberal arts education over the course of its history, particularly in the United States. Most of the documents are newly translated or no longer available in print. Arranged chronologically, each selection is accompanied by an informative introduction and extensive explanatory notes discussing its place within the liberal arts tradition. Based upon the author's twenty-five years of experience leading seminars concerning the history of liberal education, this collection presents a uniquely comprehensive and salient set of documents, while incorporating the neglected portrayal and discussion of women within the history of the liberal arts.

The field of marketing science has a rich history of modeling marketing phenomena using the disciplines of economics, statistics, operations research, and other related fields. Since it is roughly 50 years from its origins, The History of Marketing Science is a timely review of the accomplishments of marketing scientists in a number of

research areas. Different research areas of marketing science, such as Pricing, Internet Marketing, Diffusion Models, and Advertising, are treated to a highly readable and easy-to-digest historical analysis by the contributing authors. Each chapter provides a chronological timeline of key historical developments in the area of marketing science covered. Readers of other disciplinary backgrounds outside of economics, statistics, and operations research will be more than able to appreciate the development of marketing science as a field of research and its pioneers through the book.
