Subtracting Integers from (-15) to $(+15)$ (Negative Numbers ...

Here, you are subtracting a positive from a positive, so the result is less positive. Therefore, you will start at 4 and you have to move to the left. In this case, you will move 6 units to the left. You end up at -2 , so the answer is -2 . Take a look at the number line below to see how this is done.

Worksheets > Math > Grade 6 > Integers. Integer worksheets from K5 Learning. These grade 6 worksheets cover addition, subtraction, multiplication and division of integers. Integers are whole numbers (no fractional or decimal part) and can be negative or positive.

Rule: To subtract an integer, add its opposite. The opposite of -282 is $+282$, so we get: $+20,320 - -282 = +20,320 + +282 = +20,602$ In the above problem, we added the opposite of the second integer and subtraction was transformed into addition. Let's look at some simpler examples of subtracting integers.
