Sugarcane does not wither. You can plant it anywhere and leave it to be harvested later. The cane grows back by itself - you don't have to plant it again (except after a periodical ploughing). Cane, like grains, requires ploughing (or use of a subsoiler) every 3rd harvest.

[How To Grow Sugar Cane - BackGarden.org](#)

Sugarcane or sugar cane refer to several species and hybrids of tall perennial grass in the genus *Saccharum*, tribe Andropogoneae, that are used for sugar production. The plants are two to six metres (six to twenty feet) tall with stout, jointed, fibrous stalks that are rich in sucrose, which accumulates in the stalk internodes.

...

Container Growing. Sugarcane plants grow very well in patio containers. Allow enough room for growth generally a 18" to a 24" diameter, 10" deep container will suffice. Remember the looser the roots, the taller and healthier your plant will be. When the plant becomes root bound its growth will slow. At that point it is time for a larger pot.
