The Department of Defense now faces the challenge of responding to the imminent retirement of a large proportion of its civilian workers and the impending U.S. military transformation that will likely require a larger civilian workforce to support a new force structure. One way in which DoD plans to address this challenge is through recruiting "the best talent available." In its efforts to determine effective ways to recruit such workers, DoD asked the RAND Corporation to look at intern programs, characterizing DoD's current intern programs, identifying best practices for intern programs among private-sector firms and other government agencies, and recommending approaches for improving such

programs. This monograph describes RAND's response, presenting and synthesizing insights and findings from interviews the authors conducted with managers of DoD and corporate intern programs, from a review of literature on intern programs, and from analyses of personnel data, and making specific DoD policy recommendations.

Vault Guide to Top Internships BRILL

For minority law students or attorneys, no factor is more important in deciding where to work than the quality of a firm's diversity program is central to their decision.

The Stargazer Journal The Princeton Review

Second International Conference on Chemical Engineering Education presents the situation in chemical engineering education in Germany, Hungary, Spain,

Japan, and in the United States. This book depicts an awareness of the problems of professional education together with a wide spectrum of opinions on their solution. Organized into 39 chapters, this book begins with an overview of the actual situation of chemical engineering education program in Spain. This text then examines the detailed formalities of chemical engineering in secondary schools. Other chapters consider the change in chemical engineering education in Japan due to the change of chemical industries as well as by a great change of students' attitude. This book discusses as well the curriculum proposal for the education of undergraduate and graduate levels as well as foreign students' education. The final chapter reviews the European situation of chemical engineering education system. This book is a valuable resource for teachers and students of chemical engineering.

Lists internship opportunities in a variety of fields, giving information about selectivity, compensation, deadlines, and duration.

8 Practice Tests for the SAT 2018 The Rosen Publishing Group, Inc

A young girl with an unfortunate name struggles to believe there's anything special about herself, even in the midst of astrology and spell casting colliding around her. Initially forced to reside at her aunt's house in California, she stumbles upon the Society of Celestial Knowledge and embarks on a mission to uncover the mystery surrounding her Uncle's tragic death years earlier. Within the society, there are four Coven Rings and four paths of magic, and plenty of unsavory people out to stop her. A pinch of science fiction, a touch of multi-culturism, and several doses of humor combine for a delectable reader's brew in this magical, not-quite-a-witch-story, adventure.

8 Practice Tests for the SAT The Best 109 Internships

Students learn that internships and volunteer positions can give them a foot in the door for permanent employment in math or science careers. They discover that these opportunities can provide options for sampling different careers and perhaps discover those vocations are not what they anticipated. Intern and volunteer positions are excellent platforms for testing the waters and determining which career will be most satisfactory for their life's work. Readers gain tools for developing a mission statement, exploring print and online sources for finding openings in science and math, and applying for those positions. They also learn about creating a positive digital footprint now so they can present themselves as serious job candidates in the future. Some of the volunteer and intern possibilities that are covered include: zoos, aquariums, local companies, websites, labs and research facilities, the robotics industry, aeronautics, and the chemical engineering, energy, and pharmaceuticals industries.

Second International Conference on Chemical Engineering Education Rand Corporation

The scope of opportunities in chemical and biomolecular engineering has grown tremendously in recent years. Careers in Chemical and Biomolecular Engineering conveys the breadth and depth of today's chemical and biomolecular engineering practice, and describes the intellectually enriching, socially conscious and financially lucrative opportunities available for such graduates in an ever-widening array of industries and applications. This book aims to help students interested in studying chemical engineering and biomolecular engineering to understand the many potential career pathways that are available in these dynamic fields — and is an indispensable resource for the parents, teachers, advisors and guidance counselors who support them. In addition to 10 chapters that discuss the roles such graduates play in many diverse industries, this book also features 25 Profile articles that share in-depth, first-person insight from industry-leading chemical and biomolecular engineers. These technical professionals discuss their work and educational experiences (in terms of both triumphs and challenges), and share

wisdom and recommendations for students pursuing these two dynamic engineering disciplines.

Ferguson's Careers in Focus books are a valuable career exploration tool for libraries and career centers. Written in an easy-to-understand yet informative style, this series surveys a wide array of commonly held jobs and is arranged into volumes organized by specific industries and interests. Each of these informative books is loaded with up-to-date career information presented in a featured industry article and a selection of detailed professions articles. The information here has been researched, vetted, and analyzed by Ferguson's editors, drawing from government and industry sources, professional groups, news reports, career and job-search resources, and a variety of other sources. For readers making career choices, these books offer a wealth of helpful information and resources. Each profession article includes:

- Quick Facts: a snapshot of important job facts
- Overview: briefly introduces duties and responsibilities
- History: describes the origins and history of the job
- The Job: describes primary and secondary goals and duties
- Earnings: discusses salary ranges and typical fringe benefits
- Work Environment: looks at typical work conditions and surroundings associated with the job
- Exploring: offers suggestions on how to gain experience and knowledge about—or even test drive—a career before making a commitment
- Education and Training Requirements: discusses required high

school and post-secondary education and training Certification, Licensing, and Special Requirements: explains recommended and required certifications or prerequisites for the job Experience, Skills, and Personality Traits: summarizes the personal traits and skills and professional experience needed to get started and succeed Employer Prospects: gives an overview of typical places of employment and the best ways to land a job Advancement Prospects: presents an expected career path and how to travel it Outlook: summarizes the job's potential growth or decline in terms of the general economy and industry projections Unions and Associations: lists essential and helpful professional groups Tips for Entry: additional tips for preparing for a career and getting a foot in the door For More Information: lists organizations that provide career information, networking, and professional development Sidebars: short features showcasing stats, trivia, and insight about a profession or industry Careers in Focus: Pharmaceuticals and Biotechnology, Third Edition covers 28 jobs, including: Biochemical Engineers Biochemists Bioinformatics Specialists Biologists Biomedical Engineers Biomedical Equipment Technicians Biotechnology Patent Lawyers Biotechnology Production Workers Biotechnology Research Assistants Chemical Engineers Chemical Technicians Chemists Clinical Research Coordinators Drug Developers Genetic Engineers Genetic Scientists Laboratory Technicians and Technologists Laboratory Testing Technicians
