The books in this two-volume series present the most important tools and information on how to utilize the"Book of Changes(I Ching)."The"Book of Sun and Moon, "an alternative-though accurate-translation for the title of the"I Ching, "is both a book of divination and calculation. Its use in divination means to apply intuition concerning the oracle of the hexagrams (the sixty-four images of broken and unbroken Yin-and-Yang lines). Its ability to calculate and determine possible outcomes for any situation involves examining the logical correlations associated with each of the hexagrams and what images they change into and head toward. Using the"Book of Sun and Moon"is like being a detective or tracker. The images are the clues and tracks, and a good detective or tracker needs not only tools of deduction and observation, but also a strong sense of intuition. Hence, the"Book of Sun and Moon"provides the main tools for both. Some questions put to the"Book of Sun and Moon"may only seem to need an understanding of the oracle portion, while others may only seem to require the use of logic and calculation. Without applying both intuition and logic, however, you are only receiving half the picture and limiting the amount of information the"Book of Sun and Moon"can provide. Volume I contains background historical information and explanations of the"I Ching's" construction and uses for divination and calculation. Volume II contains the translations of the original"Book of Sun and Moon, "along with specific correlations for the hexagrams and trigrams for interpretation, as well as Stuart Alve Olson's commentaries derived from various Chinese sources. These new editions of the"Book of Sun and Moon"provide a distinctly Daoist perspective on the work, which sets them apart from the majority of other translations of the"I Ching"that contain commentaries based on Confucian ideals and philosophy.

Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patters) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In The Spell of the Sensuous David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.
