Cannabis: Evolution and Ethnobotany is a comprehensive, interdisciplinary exploration of the natural origins and early evolution of this famous plant, highlighting its historic role in the development of human societies. Cannabis has long been prized for the strong and durable fiber in its stalks, its edible and oil-rich seeds, and the psychoactive and medicinal compounds produced by its female flowers. The culturally valuable and often irreplaceable goods derived

from cannabis deeply influenced the commercial, medical, ritual, and religious practices of cultures throughout the ages, and human desire for these commodities directed the evolution of the plant toward its contemporary varieties. As interest in cannabis grows and public debate over its many uses rises, this book will help us understand why humanity continues to rely on this plant and adapts it to suit our needs.

Reprints and reminiscences from the magazine 's first decade: " Fun to flip through . . . Where would American humor be without the National Lampoon? " —The New Yorker From its first issue in April 1970, the National Lampoon blazed like a comet, defining comedy as we know it today. To create Drunk Stoned Brilliant Dead, former Lampoon illustrator Rick Meyerowitz selected the funniest material from the magazine and sought out the survivors of its first electrifying decade to gather their most revealing and outrageous stories. The result is a mind-boggling tour through the early days of an institution

whose alumni left their fingerprints all over popular culture: Animal House, Caddyshack, Saturday Night Live, Ghostbusters, SCTV, Spinal Tap, In Living Color, Ren & Stimpy, The Simpsons—even Sesame Street counts a few Lampooners among its ranks. This is the story of a band of young talents who “irrevocably rewrote the landscape of American humor” (Publishers Weekly). “A vivid picture of a tight-knit family of twentysomething humorists at the dawn of their careers.” —Newsweek “The other night I started laughing so hard I had to leave the room . . . And then I realized that I hadn’t laughed so hard in 35 years, since I was a teenager, reading National Lampoon.” —The Wall Street Journal “If you grew up with the Lampoon, this book is a trip down memory lane like no other; if not, it will demonstrate that the much maligned 70s could produce humor that has never been surpassed.” —Vanity Fair

This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research, offering a representative sampling of published contributions to the field. The History of Medical Informatics in the United States has been restructured within this new edition, reflecting the transformation medical informatics has undergone in the years since 1990. The systems that were once exclusively institutionally driven – hospital, multihospital, and outpatient information systems – are today joined by systems that are driven by clinical subspecialties, nursing, pathology, clinical laboratory, pharmacy, imaging, and more. At the core is the person – not the clinician, not the institution – whose health all these systems are designed to serve. A group of world-renowned authors have joined forces with Dr Marion Ball to bring Dr Collen’s incredible work to press. These recognized leaders in medical informatics, many of whom are recipients of the Morris F. Collen Award in Medical Informatics and were friends of or mentored by Dr Collen, carefully reviewed, editing and updating his draft chapters. This has resulted in the most thorough history of the subject imaginable, and also

provides readers with a roadmap for the subject well into later in the century.

Go beyond the photographic conventions, break the rules, and create compelling portraits. While the ability to create a conventional, traditional portrait is a must-have skill for any photographer of people, it can often yield a fairly predictable result: a straightforward likeness of the subject, created with a flattering lens in flattering light with a flattering composition. The subject may be pleased with the results, but it's not a very interesting photograph. And in the constant, endless stream of images we consume daily, the portrait is likely forgotten as quickly as it appeared. A truly creative portrait comes from the two-sided exchange between the subject and the photographer, with both parties working together to create an image that goes beyond the simple representation of the subject. The end result is not an image that simply breaks the rules--it's an engaging photograph that both captures the essence of the subject and compels the viewer to stop and take notice. In *The Creative Portrait*, photographer and author Nick Fancher walks you through a plethora of ideas and techniques for making such creative work. Known for imagery that is bold, colorful, expressive, and widely varied, Nick has built a career by going against the grain. The result has been a consistent output of innovative and striking photographs. In this book, Nick will help you go beyond the

conventional approach and explore the endless possibilities that come with intentionally breaking the rules. He'll teach you all about: -The gear he uses, and his overall approach to shooting -Why it's so important to practice photographing paper, plastic, and plants -Multiple long exposure techniques for creating unique and expressive images -Blocking, directing, and concentrating light with cookies, flags, gobos, and snoots -Shooting through glass for numerous creative effects -How he employs smoke, mirrors, and projectors in his work -And much more Throughout the book, Nick includes behind-the-scenes photos and diagrams of his shoots, as well as Lightroom post-processing techniques so you can follow along. He also includes over a dozen creative prompts to actively push you to go beyond your own comfort zone in your photography in order to create compelling portraiture.

Stravinsky's score for the ballet "Petrouchka," commissioned by Diaghilev for the Ballets Russes, was first performed in Paris in 1911 and was an immediate sensation with the public and the critics. It followed by a year the great success of his score for "The Firebird," also produced by the Ballets Russes, and it confirmed Stravinsky's reputation as the most gifted of the younger generation of Russian composers. The ballet had begun in Stravinsky's mind as a "picture of a puppet suddenly endowed with life, exasperating the patience of the orchestra with diabolical cascades of arpeggios." Soon Diaghilev had convinced the young composer to turn the work into a ballet score. Benois was chosen to be his collaborator in the libretto, Fokine and Nijinsky became involved, and the bizarre tale of three dancing puppets Petrouchka (a folk character in Russian lore), the Ballerina, and the Moor, brought to life in a tragic tale of love would soon

become one of the most acclaimed and performed of ballet masterpieces. Brilliantly orchestrated, filled with Russian folksong as well as new and striking harmonies, alternately poignant and splendidly imposing, the score of "Petrouchka" continues to be a popular subject for the study of tonal language and orchestration. This edition is an unabridged republication of the original edition published in 1912 by Edition Russe de Musique in Berlin. Printed on fine paper, sturdily bound, yet remarkably inexpensive, it offers musical scholars, musical performers, and music lovers a lifetime of pleasurable study and enjoyment of one of the most popular and acclaimed musical works of the twentieth century."

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite

numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Since the late 1990s South Korea has emerged as a new center for the production of transnational popular culture - the first instance of a major global circulation of Korean popular culture in history. Why popular (or not)? Why now? What does it mean socially, culturally and politically in a global context? This edited collection considers the Korean Wave in a global digital age and addresses the social, cultural and political implications in their complexity and paradox within the contexts of global inequalities and uneven power structures. The emerging consequences at multiple levels - both macro structures and micro processes that influence media production, distribution,

representation and consumption - deserve to be analyzed and explored fully in an increasingly global media environment. This book argues for the Korean Wave's double capacity in the creation of new and complex spaces of identity that are both enabling and disabling cultural diversity in a digital cosmopolitan world. The Korean Wave combines theoretical perspectives with grounded case studies in an up-to-date and accessible volume ideal for both undergraduate and postgraduate students of Media and Communications, Cultural Studies, Korean Studies and Asian Studies.
