A good 5.1-channel system will give you a full surround sound experience. Most DVD and Blu-ray™ media, some Super Audio CDs (SACDs), broadcast TV, and many streaming sources are in 5.1-channel format. Going to 7.1 channels improves the directionality of sound effects and helps you feel more of your entertainment.

That means you need two amplifiers; one for surround sound and another for stereo. The surround amplifier (or receiver) needs to have pre-outs for the front-left and front-right speakers that bypass the unit ' s own power amplification and output an analogue signal to the stereo amp. Pre-outs are pretty common on AV amps above £ 500 (we ' ve listed some current models below).
