This book presents the Precariat – an emerging class, comprising the rapidly growing number of people facing lives of insecurity, moving in and out of jobs that give little meaning to their lives. Guy Standing argues that this class is producing instabilities in society. Although it would be wrong to characterise members of the Precariat as victims, many are frustrated and angry. The Precariat is dangerous because it is internally divided, leading to the villainisation of migrants and other vulnerable groups. Lacking agency, its

members may be susceptible to the siren calls of political extremism. To prevent a 'politics of inferno', Guy Standing argues for a 'politics of paradise', in which redistribution and income security are reconfigured in a new kind of Good Society, and in which the fears and aspirations of the Precariat are made central to a progressive strategy. This second edition of "Children's needs - parenting capacity"

updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual

---

circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing

such problems. Coping with Critical, Demanding, and Dysfunctional Parents John Wiley & Sons  
Surviving a Borderline Parent is the first step-by-step guide for adult children of parents with borderline personality disorder. Between 6 and 10 million people in the US suffer from borderline personality disorder. This book teaches adult children how to overcome the devastating effects of growing up with a parent who suffers from BPD. Although relatively common, borderline

personality disorder (BPD) is often overlooked or misdiagnosed by therapists and clinicians and denied by those who suffer from it. Symptoms of this problem include unpredictability, violence and uncontrollable anger, deep depression and self-abuse. Parents with BPD are often unable to provide for the basic physical and emotional needs of their children. In an ironic and painful role reversal, BPD parents can actually raise children to be their caretakers. They may burden even very young children with adult responsibilities. If you were

---

raised by a BPD parent, your childhood was a volatile and painful time. This book, the first written specifically for children of borderline parents, offers step-by-step guidance to understanding and overcoming the lasting effects of being raised by a person suffering from this disorder. Discover specific coping strategies for dealing with issues common to children of borderline parents: low self-esteem, lack of trust, guilt, and hypersensitivity. Make the major decision whether to confront your parent about his or her condition.

People with Borderline Personality Disorder (BPD) challenge those close to them with their often bewildering mood shifts and unpredictable behavior. For those people who have relationships with persons with BPD, whether they be relatives, friends, spouses, parents, or children, this book should prove a godsend. It delineates the ways in

which borderline individuals' (BPs) behavior and communications frustrate and perplex those around them but goes further in articulating specific strategies that those close to the person with Borderline Personality Disorder (non-BPs, as they are termed in this book) can effectively cope with these kinds of behaviors. ----Larry J. ### Blown to Bits Basic Books

The bestselling book on childhood trauma and the enduring effects of repressed anger and pain Why are many of the most successful people plagued by feelings of emptiness

and alienation? This wise and profound book has provided millions of readers with an answer--and has helped them to apply it to their own lives. Far too many of us had to learn as children to hide our own feelings, needs, and memories skillfully in order to meet our parents' expectations and win their "love." Alice Miller writes, "When I used the word 'gifted' in the title, I had in mind neither children

who receive high grades in school nor children talented in a special way. I simply meant all of us who have survived an abusive childhood thanks to an ability to adapt even to unspeakable cruelty by becoming numb.... Without this 'gift' offered us by nature, we would not have survived." But merely surviving is not enough. The Drama of the Gifted Child helps us to reclaim our life by

Stop Walking on Eggshells for Parents Penguin In this groundbreaking book, a leading clinical psychiatrist redefines how we think about and treat victims of trauma. A "stunning achievement" that remains a "classic for our generation." (Bessel van

Splitting John Wiley & Sons The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from

borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for

prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a make-believe mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to

---

attend to the hermit without feeding her fear, to love the queen without becoming her subject, and to live with the witch without becoming her victim. A Jason Aronson Book
