This is the fifth volume of what is now known as "The Notational Quintet,"

a collection of acerbic and penetrating views of our contemporary society. The author tends toward pessimism but there are occasional bright rays that engender some hope. In reading these pieces you may be disturbed—occasionally outraged—but not bored. Good for deck reading on SS Titanic...

We Refuse to Be Silent

A provocative and lively examination of the meaning of America's first black

presidency, by the New York Times-bestselling author of *Tears We Cannot Stop*. Michael Eric Dyson explores the powerful, surprising way the politics of race have shaped Barack Obama's identity and groundbreaking presidency. How has President Obama dealt publicly with race—as the national traumas of Tamir Rice, Trayvon Martin, Michael Brown, Eric Garner, Freddie Gray, and Walter Scott have played out during his tenure? What can we learn from Obama's

major race speeches about his approach to racial conflict and the black criticism it provokes? Dyson explores whether Obama's use of his own biracialism as a radiant symbol has been driven by the president's desire to avoid a painful moral reckoning on race. And he sheds light on identity issues within the black power structure, telling the fascinating story of how Obama has spurned traditional black power brokers, significantly

reducing their leverage. President Obama's own voice—from an Oval Office interview granted to Dyson for this book—along with those of Eric Holder, Al Sharpton, Jesse Jackson, Andrew Young, and Maxine Waters, among others, add unique depth to this profound tour of the nation's first black presidency. "Dyson proves...that he is without peer when it comes to contextualizing race in twenty-first-century

America... A must-read for anyone who wants to better understand America's racial past, present, and future."—Gilbert King, author of the Pulitzer Prize-winning *Devil in the Grove* "No one understands the American dilemma of race—and Barack Obama's confounding and yet wondrous grappling with it—better than [Dyson.]"—Douglas Blackmon, author of the Pulitzer Prize-winning *Slavery by Another Name* [Hip Hop Ain't Dead: It's Livin' in the White House](#) Bloomsbury

In this rich analysis of the changing ideals of citizenship, Stephen K. White offers a path for the renewal of democratic life in the twenty-first century. Looking beyond passive notions of citizenship defined in terms of voting or passport possession, White seeks a more aspirational portrait, both participatory and inclusive, that challenges citizens, especially in the middle class, to confront power structures to achieve greater justice. Using the Tea Party and followers of Donald Trump as foils, he shows how these groups' resentful and exclusivist conceptions of active citizenship undermine democratic aspirations. White explores how

such deleterious influence might be effectively engaged by a robust counter-conception on the democratic left. The book makes this aspirational ideal conceptually clear, normatively compelling and aesthetically attractive.

This provocative look at the connections—and conflicts—between Latinos and African Americans in the United States assesses the challenges facing both groups as they strive to achieve the American dream. Latino and African American communities in the United States share neighborhoods, similar family values, and many of the same challenges faced by minorities, yet are often at odds about their distinctive cultures and position in society. This book looks at the social and political history of both

groups, pointing out their differences and similarities, and exploring their perceived role in America's social strata. Author Karen Juanita Carrillo delves into the often-controversial issues that have undermined Afro-Latino race relations in this country, including how the war on poverty led to competition and animosity, how the legacy of slavery bears on their relationship, and how prejudices among new immigrants inflame existing tensions. The book features a multitude of views and perspectives on what it means to be

American for Latino and African American populations. Its extensive discussion of immigrant groups includes those arriving from Mexico, Puerto Rico, Cuba, El Salvador, Dominican Republic, Guatemala, Colombia, Honduras, Ecuador and Peru.

Eddie Tipton went to prison in 2017 for masterminding the biggest lottery fraud in U.S. history. In a twisting and bizarre tale, he somehow mixed a cocktail of greed, Bigfoot hunting, deception, cybercrime

and a love of hot dogs on his way to a felony conviction after he and several accomplices scored a series of jackpots from rigged drawings but fell short on the biggest "score" of them all. Call it "The \$80 Billion Gamble" because the future of the entire lottery industry was at risk if someone didn't solve this case of computer tampering and multimillion-dollar prizes. Tipton's

downfall made international news, but this book tells the story of the investigators and public officials who solved the mystery. Veteran journalist Perry Beeman and retired lottery executive Terry Rich use a vivid mixture of recorded phone calls, court documents, personal communications and the public record to give readers an exclusive inside view of one of the most surprising and

captivating white-collar crimes the nation has seen. It's a wild story of greed and misplaced confidence, and a study in public officials whose determination survived a nearly cold trail, a team that insisted on being transparent and sticking with the case. Fast-paced and utterly gripping, Spam Nation ultimately proposes concrete solutions for protecting ourselves online and stemming this tidal wave of cybercrime-before it's too late. Relying on a multidisciplinary framework of inquiry and critical perspective, this edited volume addresses the unique experiences of Black males within various stages of contact in the criminal justice system. It provides a comprehensive overview of the administration of justice, mental and physical health issues faced by Black males, and reintegration into society after system

involvement. Recent events—including but by no means limited to the shootings of unarmed Black men by police in Ferguson, Missouri; Baltimore; Minneapolis; and Chicago—have highlighted the disproportionate likelihood of young Black males to encounter the criminal justice system. *Black Males and the Criminal Justice System* provides a theoretical and empirical review of the need for an intersectional understanding of Black

male experiences and outcomes within the criminal justice system. The intersectional approach, which posits that outcomes of societal experiences are determined by the way the interconnected identities of individuals are perceived and responded to by others, is key to recognizing the various forms of oppression that Black males experience, and the impact these experiences have on them and their families. This book is

intended for students and scholars in criminology, criminal justice, sociology, race/ethnic studies, legal studies, psychology, and African American Studies, and will serve as a reference for researchers who wish to utilize a progressive theoretical approach to study social control, policing, and the criminal justice system.

Providing chronologies of important events, historical narratives

from the first settlement to the present, and biographies of major figures, this work offers readers an unseen look at the history of racism from the perspective of individual states. From the initial impact of European settlement on indigenous populations to the racial divides caused by immigration and police shootings in the 21st century, each American state has imposed some form of racial restriction on its

residents. The United States proclaims a belief in freedom and justice for all, but members of various minority racial groups have often faced a different reality, as seen in such examples as the forcible dispossession of indigenous peoples during the Trail of Tears, Jim Crow laws' crushing discrimination of blacks, and the manifest unfairness of the Chinese Exclusion

Act. Including the District of Columbia, the 51 entries in these two volumes cover the state-specific histories of all of the major minority and immigrant groups in the United States, including African Americans, Hispanics, Asian Americans, and Native Americans. Every state has had a unique experience in attempting to build a community comprising multiple racial groups, and the chronologies, narratives, and biographies that compose the entries in this collection explore the consequences of racism from states' perspectives, revealing distinct new insights into their respective racial histories.

Cultures of Populism

"We gravitate toward people like us; it's human nature. Race, class, and gender affect this social identity, but one overlooked factor can be even more

powerful: the way we speak. As pioneering psychologist Katherine Kinzler reveals in *How You Say It*, that's because our speech largely reflects the voices we heard as children. We can change how we speak to some extent, whether by "code-switching" between dialects or learning a new language. But for the most part we are forever marked by our native tongue-and are hardwired to prejudge others by theirs, often with serious consequences. Your accent alone can determine the economic opportunity or discrimination you encounter in life, making

speech one of the most urgent social-justice issues of our day. Ultimately, Kinzler shows, our linguistic differences can also be a force for good. For her research reveals that exposure to different languages is beneficial-a paradox that hints at the benefits we can reap from mastering this ancient source of tribalism"--

Written by veteran reporters Michael Isikoff and David Corn, this is an inside look at how a president took the nation to war using faulty and fraudulent intelligence. It's a dramatic page-turner and an intriguing account of conspiracy, backstabbing, bureaucratic ineptitude, journalistic malfeasance, and arrogance.

destined to always be a violent nation? This sweeping history by U.S. senator Chris Murphy explores the origins of our violent impulses, the roots of our obsession with firearms, and the mythologies that prevent us from confronting our national crisis. In many ways, the United States sets the pace for other nations to follow. Yet on the most important human concern—the need to keep ourselves and our loved ones safe from physical harm—America isn ’ t a

leader. We are disturbingly laggard. To confront this problem, we must first understand it. In this carefully researched and deeply emotional book, Senator Chris Murphy dissects our country ’ s violence-filled history and the role that our unique obsession with firearms plays in this national epidemic. Murphy tells the story of his profound personal transformation in the wake of the mass murder at Newtown, and his subsequent immersion in

the complicated web of influences that drive American violence. Murphy comes to the conclusion that while America ' s relationship to violence is indeed unique, America is not inescapably violent. Even as he details the reasons we ' ve tolerated so much bloodshed for so long, he explains that we have the power to change. Murphy takes on the familiar arguments, obliterates the stale talking points, and charts the way to a fresh, less polarized

conversation about violence and the weapons that enable it—a conversation we urgently need in order to transform the national dialogue and save lives.
