Sustainable Tourism VI contains the proceedings of the sixth International Conference in this successful series on Sustainable Tourism. Tourism has become a major international industry, with many countries all over the world relying on the income it produces. Its economic advantages as a major source of finance and employment frequently leads to its active promotion by governments and other institutions, independent of the consequences on the environment, ecology and social structure of affected regions. Issues concerned with achieving environmental social and economic sustainability of tourism alongside the governance mechanisms needed to support sustainable tourism are highlighted. Also discussed is how new resources ought to be employed to avoid the errors committed in the past and propose remedial actions when required. This book takes a broad view of this sophisticated and complex industry, and examines the practice of sustainable tourism from global travel trends through to destination and site management. Innovative solutions, including ecological tourism, as well as cultural initiatives that will lead to better approaches to tourism with the objective of preserving the diversity of our planet. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism and the implications for the human economy and society constitute very important study objectives. To protect the natural and cultural landscape new solutions need to be developed which minimise the adverse effects of tourism. This can be achieved through new strategies involving the active collaboration of society as a whole. Topics covered include: Tourism strategies; Environmental issues; Emergent strategies for tourism development; Community issues; Climate change; Safety and Security; Tourism as a tool of development; Art, architecture and culture; Heritage tourism; Special interest tourism; Marine and coastal areas tourism; Sport tourism; City tourism; Tourism impact; Tourism and protected area; Rural tourism; Transport and tourism; Education and training; Theme parks; Destination management; Planning and development; Simulation models; Social and physical infrastructure.

Sustainable Tourism is an authoritative text which provides an accessible guide to the current approaches, issues and experiences in the geography of sustainable tourism. It provides in-depth debates on the contemporary geographical approaches to sustainable tourism and provides relevant supporting global case studies. The text is divided into two sections, the first examines a variety of contemporary approaches to sustainable tourism from a number of different disciplinary and sub-disciplinary perspectives. Contributions are made from the fields of economic geography and cultural geography as well as the more traditional resource management field. The collection of chapters help convey to the reader how issues of sustainability are related to contemporary geographical debates over restructuring, postfordism, cultural identity, and place promotion as well as research on management frameworks and techniques to ameliorate environmental impacts. The second section presents relevant and supporting case studies on sustainable tourism which vary in location and developmental context. **Sustainable Tourism** is an essential text for undergraduates taking courses in tourism, environmental studies and other related courses.

Many of the world's islands are dependent on tourism as their main source of income. It is therefore imperative that these destinations are managed for long-term viability. The natural appeal of a destination is typically one of its main tourism related assets, yet the natural environment is also the feature most directly threatened by potential overexploitation. **Sustainable Tourism in Island Destinations** builds on existing literature in the subject by providing innovative discussions and practical management structures through the use of the authors' various island project work. An original feature is the focus on islands which are part of larger nations, rather than just on island sovereign states. Through an illustrated case study approach, the book focuses on the successes and challenges islands face in achieving sustainable tourism. The authors put forward innovative mechanisms such as multi-stakeholder partnerships and incentive-driven non-regulatory approaches as ways that the sustainability agenda can move forward in destinations that face specific challenges due to their geography and historic development. The case studies - from Canada, St Kitts, Honduras, China, Indonesia, Spain, Tanzania and Thailand - provide the foundation which suggests that alternative approaches to tourism development are possible if they retain sustainability as a priority.

Sustainable Tourism Policy and Planning in Africa Springer Science & Business Media

Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub-Saharan Africa and provides some interesting recommendations on how these could be overcome. Tourism is currently growing faster in Sub-Saharan Africa (SSA) and in many other developing regions compared to the rest of the world. Using case examples from different segments of the tourism sector in different country contexts, this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years. It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security, the human capacity management, service delivery, local communities and heritage management, climate change and the influence of colonial legacies on tourism policy planning. For many SSA countries, it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm. The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice, and examine the extent to which these are shaping the present, and their implications for the future sustainability of the tourism sector.

Sustainable Tourism Policy and Planning in Africa will be of great value to academics, private and third sector employees to better understand tourism in Sub-Saharan Africa. Eight of the chapters were originally published as a special issue of **Tourism Planning and Development**. These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning.

The Business of Sustainable Tourism Development and Management IGI Global

Seminar paper from the year 2013 in the subject Tourism, grade: 2,0, University of Applied Sciences Bremen (IGC), course: Sustainable Tourism Management, language: English, abstract: The world's resources are limited and will sooner or later come to an end. This is an undeniable fact as the consequences of decades of reckless exploitation are painfully being brought to our eyes by countless reports on continuing ozone depletion, growing desertification, fatal meltdown of the polar caps and inexorable global warming. Yet the plain realization does not always go hand in hand with immediate action. While there is a new global consciousness towards ecology and the preservation of nature there is still a long way to go in order to avert the earth's destruction. The tourism sector - being described by the UNWTO (2012, p. 2) as one of the world's largest and fastest growing industries - plays a crucial role in this context. The enormous growth not only in the transportation sector holds a major responsibility for increasing CO2 emissions worldwide. But it is not only the environmental destruction that the tourism industry needs to fear and assume responsibility for. Negative impacts of Globalization are being exacerbated as the tourism sector continues to grow. The rich become richer on the expense of the poor, local communities are being exploited as tourist attractions, and traditions and social structures get lost due to increasing intercultural contacts. If the tourism industry does not take immediate action it will destroy its most important resources: beautiful nature, traditional culture and the hospitality of local people. But is it really this easy? Are all globalization effects negative? Do the poor always have to be the losers in this process? Is it exploitation, when local communities show their traditions to foreigners? Or is it a welcome opportunity to generate new income and improve the well-being of the people? Who decides what is good for the world and on what basis? For many tourism businesses the term "sustainable development" has become a keyword. Can this concept show a way out of the dilemma? Or is it just an empty shell used to improve one's reputation and boost sales? These are some of the questions that will be addressed in this paper in order to evaluate the future of the concept of "sustainable development" for the tourism industry.

Tourism is the world's fastest growing industry, and impacts globally upon ecology, economies, peoples, cultures and the built environment. Development, therefore, must be sustainable and sympathetic in order to preserve the environment and culture it exploits. Despite sustainable tourism being an area of considerable recent interest, there has been no synthesis of the diverse considerations of sustainable tourism, and the language and terms particular to this subject. An important resource for researchers of tourism, this reference work defines and explains terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems.

that supports it.

The Routledge Handbook of Tourism and Sustainability Routledge

Cultural Sustainability, Tourism and Development considers how tourism provides a lens to examine issues of cultural sustainability and change. It discusses how cultural and natural assets, artistic interventions, place identity, policy strategies, and community well-being are intertwined in (re)articulations of place and local dynamics that occur in tourist locations. With a primary focus on culture in sustainable development, the book clarifies connections between culture as a core dimension of local sustainability and cultural dimensions of sustainable tourism. It highlights the roles and place of cultural expression, artistic activity, and heritage resources in local or regional sustainable development contexts. Chapters critically examine the dimensions of tourism-invoked dynamics of change and the cultural impacts of tourism-related activities. The book concludes with proposals for new culture-informed and creativity-based approaches, mediations, and relations to encourage a better balance between visitors and residents' quality of life and the broader sustainability of the area. Interdisciplinary and international in scope, contributions reflect on communities and rural areas located in Brazil, Canada, Croatia, India, Italy, Japan, the Netherlands, Poland, Portugal, and the United States. This book will be of great interest to students and scholars of cultural development and policy, heritage studies, cultural tourism and sustainable tourism, cultural geography, and regional development.
