Solving
Transport
Problems
establishes

fundamental points and good practice in resolving matters regarding green transp ortation. This is to prompt further research in conveyance issues by providing readers with new knowledge and grounds for integrated models and solution methods. Focusing on green transp ortation,	this book covers various sub- topics and thus consists of diverse content. Tra ditionally, academia and transport practitioner s have mainly concentrated on efficient fleet management to achieve economic benefits and better- quality service. More recently, due to growing	public environmenta l concerns and the industry understandin g of the issue, the academic community has started to address environmenta l issues. The studies of green tra nsportation compiled in this book have identified certain areas of interest, such as references, viewpoints, algorithms
--	--	---

and ideas. Solving Transport Problems is for researchers, environmental decision-makers and other concerned parties, to start discussion on developing optimized technology and alternative fuel-based integrated models for environmentally cleaner transport systems. British Power
