Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Drawing on a wealth of knowledge and experience and a background of more than 1,000 magazine articles on the subject, engine control expert Jeff Hartman explains everything from the basics of engine management to the building of complicated project cars. Hartman has substantially updated the material from his 1993 MBI book Fuel Injection (0-879387-43-2) to address the incredible developments in automotive fuel injection technology from the past decade, including the multitude of import cars that are the subject of so much hot rodding today. Hartman's text is extremely detailed and logically arranged to help readers better understand this complex topic.

This collection presents papers from a symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production. Rare metals include strategic metals that are in increasing demand and subject to supply risks. Metals represented include neodymium, dysprosium, scandium and others; platinum group metals including platinum, palladium, iridium, and others; battery related metals including lithium, cobalt, nickel, and aluminum; electronics-related materials including copper and gold; and refractory metals including titanium, niobium, zirconium, and hafnium. Other critical materials such as gallium, germanium, indium and silicon are also included. Papers cover various processing techniques, including but not limited to hydrometallurgy (solvent extraction, ion exchange, precipitation, and crystallization), electrometallurgy (electrorefining and electrowinning), pyrometallurgy, and aerometallurgy (supercritical fluid extraction). Contributions are focused on primary production as well as secondary production through urban mining and recycling to enable a circular economy. ?A useful resource for all involved in commodity metal production, irrespective of the major metal Provides knowledge of cross-application among industries Extraction and processing of rare metals that are the main building block of many emerging critical technologies have been receiving significant attention in recent years. The technologies that rely on critical metals are prominent worldwide, and finding a way to extract and supply them effectively is highly desirable and beneficial.

Family-Centred Assessment and Intervention in Pediatric Rehabilitation analyzes the effectiveness of Family-Centred Services (FCS) for children with disabilities or chronic illnesses. This text provides you with the exact definition of FCS and offers proof that parent involvement in children's treatment greatly enhances therapy. You can use the suggestions and methods to integrate parents into therapy, maximizing the family's intervention experiences and making your work more successful and effective. Many clinicians agree that families play a crucial part in deciding what intervention strategies are best for their children. From this text, you will learn that listening to parents and valuing parental input will give you insight into the goals, needs, and ambitions families have for their children. This enables you to choose, with the parent, the interventions that best suit your patients' needs and the needs of their families. In addition to information on how to integrate parents and families into intervention, Family-Centred Assessment and Intervention in Pediatric Rehabilitation offers suggestions that will improve your existing FCS or help you implement a family-centred approach, including: performing therapy in natural settings, such as school or home, to make changes in the children's social and physical environments acknowledging the grieving and adaptation process of families while being compassionate and understanding letting parents describe what they would like their child to be able to do and accomplish in the future putting the parents' concerns and requests first, enabling parents to deal with caring for their child supporting parents and reinforcing them when they have innovative and helpful ideas informing parents on the progress of their children and educating parents on methodologies and strategies used in FCS Many of the suggestions derived from the analysis of current data and original research in Family-Centred Assessment and Intervention in Pediatric Rehabilitation have immediate clinical applicability, allowing you to quickly adapt methods into your intervention processes. This text also provides you with information on types of evaluative methods, such as Measure of Processes of Care (MPOC) and Family-Centred Program Rating Scale (Fam PRS), that will help you determine if your FCS program is working efficiently. Emphasizing the goal of parent interaction in FCS services, Family-Centred Assessment and Intervention in Pediatric Rehabilitation offers methods that will improve your work with families and patients, making services more beneficial and relevant to the child and to their families.
