Vastly different in belief and practice, two new Buddhist religious movements in

Thailand, namely the Wat Phra Dhammakaya and Santi Asoke

emerged in Thailand in the 1970s at a time of political uncertainty, social change and increasing

dissatisfaction with the Thai Sangha and its leadership. Examining these movements, which represent two distinctive trends within contemporary Buddhism in Thailand, this book explains why they have come into being, what they have reacted against and what they offer to their members. Both movements have a wide membership outside of Thailand, with temples in the UK, Europe, USA, Japan and Australia. New Buddhist Movements in Thailand will appeal to those interested in Buddhism's confrontation with modernity, and its responses to evolving social issues in

---

Thailand, as well as to those interested in new religions in the broader context of religious studies.

Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of

"nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.

The Japanese automotive industry enjoyed spectacular success in the 1980s. This was largely due to the so-called 'Lean Production System' - the combination of an efficient production system, an effective supplier system, and a product development system. In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation. In this book, eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms, to show how the

Japanese automotive industry has managed to recover from this difficult period. He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets. In addition, the book also addresses the two major challenges to the current industry model: the rise of China and the environmental and energy supply situation.
