Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and

wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not legit—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

The Englishwoman's Review, which published from 1866 to 1910, participated in and recorded a great change in the range of possibilities open to women. The ideal of the magazine was the idea of the emerging emancipated middle-class woman: economic independence from

men, choice of occupation, participation in the male enterprises of commerce and government, access to higher education, admittance to the male professions, particularly medicine, and, of course, the power of suffrage equal to that of men. First published in 1979, this thirty-first volume contains issues from 1899. With an informative introduction by Janet Horowitz Murray and Myra Stark, and an index compiled by Anna Clark, this set is an invaluable resource to those studying nineteenth and early twentieth-century feminism and the women's movement in Britain.
