" " Chinese people should consume Chinese products! " This slogan was the catchphrase of a movement in early twentieth-century China that sought to link consumption and nationalism by instilling a concept of China as a modern " nation " with its own " national products. " From fashions in clothing to food additives, from museums to department stores, from product fairs to advertising, this movement influenced all aspects of China ' s burgeoning consumer culture. Anti-imperialist boycotts, commemorations of national humiliations, exhibitions of Chinese products, the vilification of treasonous consumers, and the promotion of Chinese captains of industry helped enforce nationalistic consumption and spread the message--patriotic Chinese bought goods made of Chinese materials by Chinese workers in factories owned and run by Chinese. In China Made, Karl Gerth argues that two key forces shaping the modern world--nationalism and consumerism--developed in tandem in China. Early in the twentieth century, nationalism branded every commodity as either " Chinese " or " foreign, " and consumer culture became the place where the notion of nationality was articulated, institutionalized, and practiced. Based on Chinese, Japanese, and English-language archives, magazines, newspapers, and books, this first exploration of the historical ties between nationalism and consumerism reinterprets fundamental aspects of modern Chinese history and suggests ways of discerning such ties in all modern nations."

The acceleration of the technical capabilities of X-ray, electron and neutron diffraction techniques in recent years has been driven by developments in synchrotron and neutron sources, detectors and computers. These allow the rapid and repeated acquisition of diffraction data as a chemical and biological structural process proceeds, following its initiation. This opens up completely new studies from timescales ranging from the sub-picosecond, at the fastest, through all the time domains up to kiloseconds, for the slower molecular processes.
