Dioxins and Furans Farrar, Straus and Giroux

The beauty and luster of passion and love counterpointed by the darkness of the criminal underworld and the Cambodian holocaust taunt Jason, a young American college grad. He and Rachany, a beautiful woman who works at the Russian Market, are pursued by a mysterious foe, and they flee across Cambodia, Laos and Thailand. They see elephants in misty forests, exotic tribes, ancient cities... They end up in Burma's rebellion, where they are pulled into the violence, into the core of journeys - the adventure of life tinged with the search for meaning, purpose and love. It's a coming-of-age story that shows we all should be careful what we wish for. ABOUT THE AUTHOR: Richard Marranca has published many stories, essays and poems and has three online books available. He has taught for twenty-five years, culminating in a Fulbright to teach American studies at the University of Munich. He is president of the New Jersey chapter of Fulbright and a trustee of New Jersey College English Association. Richard has a doctorate from New York University where he studied world literature, comparative religion and creative writing. He has traveled extensively and also received six National Endowments for the Humanities summer grants. He enjoys outdoor activities, yoga and exploration. RichardMarranca.com

Perfect for fans of the Bridgerton series by Julia Quinn. Jocelyn Cherril inherits a house in Ireland and finds herself in a fortunate situation. She is drawn to the charming Lucien Fitzgerald, who is unfortunately haunted by the aftermath of an injury from years ago. When the lovely Wanda Hayward from his past arrives in Ireland and tries to help him, Jocelyn faces a contender for the man's heart. Can she carve a place in his life for good? The novel from the 20th century

provides a dramatic love story set in rugged Ireland and was written by Averil Ives, a pseudonym of Ida Pollock. A must-read for fans of literary romance and surprising twists of fate. Averil Ives is a pseudonym of Ida Pollock (1908 – 2013), a highly successful British writer of over 125 romance novels translated into numerous languages and published across the world. Ida Pollock has sold millions of copies over her 90-year career. Pollock began writing when she was 10 years old. Ida has travelled widely, living in several different countries. She continues to be popular amongst both her devoted fan base and new readers alike. Pollock has been referred to as the "world's oldest novelist" who was still active at 105 and continued writing until her death. On the occasion of her 105th birthday, Pollock was appointed honorary vice-president of the Romantic Novelists' Association, having been one of its founding members. Ida Pollock wrote in a wide variety of pseudonyms: Joan M. Allen, Susan Barrie, Pamela Kent, Averil Ives, Anita Charles, Barbara Rowan, Jane Beaufort, Rose Burghley, Mary Whistler and Marguerite Bell.

Shadowrun Rigger 5.0 Haynes Manuals N. America, Incorporated

"If I had asked people what they wanted, they would have said faster horses." --Henry Ford As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of here-and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to

light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.

The Ashmolean Museum Hachette Books

Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Marine Shop Service Set Routledge

Orphaned and homeless in New York City at 14 years old in 2009, Carlo Juliano lived on the streets to survive until a local crime family boss, Johnny Toracio, gave him a job, his own place to live, and mentored him into a life as a gangster. For the next few years, Carlo flourished on the streets of New York befriending leaders of construction scams, art theft rings, drug cartels, biker gangs, extortion rackets, gambling, and cybercrime. In 2015, a series of events ignited a treacherous power struggle for control of New York City's underworld.

An Imperfect God is a major new biography of Washington, and the first to explore his engagement with American slavery. When George Washington wrote his will, he made the startling decision to set his slaves free; earlier he had said that holding slaves was his "only unavoidable subject of regret." In this groundbreaking work, Henry Wiencek explores the founding father's engagement with slavery at every stage of his life--as a Virginia planter, soldier, politician, president and statesman. Washington was born and raised among blacks and mixed-race people; he and his wife had blood ties to the slave community. Yet as a young man he bought and sold slaves without scruple, even raffled off children to collect debts (an incident ignored by earlier biographers). Then, on the Revolutionary battlefields where he commanded both black and white troops, Washington's attitudes began to change. He and the other framers enshrined slavery in the Constitution, but, Wiencek shows, even before he became president Washington had begun to see the system's evil. Wiencek's revelatory narrative, based on a meticulous examination of private papers, court records, and the voluminous Washington archives, documents for the first time the moral transformation culminating in Washington's determination to emancipate his slaves. He acted too late to keep the new republic from perpetuating slavery, but his repentance was genuine. And it was perhaps related to the possibility--as the oral history of Mount Vernon's slave descendants has long asserted--that a slave named West Ford was the son of George and a woman named Venus; Wiencek has new evidence that this could indeed have been true. George Washington's heroic stature as Father of Our Country is not diminished in this superb, nuanced portrait: now we see Washington in full as a man of his time and ahead of his time.

For the first time ever, all paintings in the Department of Western Art in the Ashmolean Museum have been brought together in one volume. Every picture is illustrated and almost all are represented in colour. Biographies of all known artists in the collection are also included, making this catalogue an invaluable reference work for specialist libraries, collectors and general readers alike.

An Imperfect God Haynes Manuals N. America, Incorporated

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a

comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international-and intranational-level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Coaching Certification Manual Haynes Manuals N. America, Incorporated

Perhaps quantum mechanics is viewed as the most remarkable development in 20th century physics. Each successful theory is exclusively concerned about "results of measurement". Quantum mechanics point of view is completely different from classical physics in measurement, because in microscopic world of quantum mechanics, a direct measurement as classical form is impossible. Therefore, over the years of developments of quantum mechanics, always challenging part of quantum mechanics lies in measurements. This book has been written by an international invited group of authors and it is created to clarify different interpretation about measurement in quantum mechanics.

The forty-nine papers collected here illuminate the meaning of quantum theory as it is disclosed in the measurement process. Together with an introduction and a supplemental annotated bibliography, they discuss issues that make quantum theory, overarching principle of twentieth-century physics, appear to many to prefigure a new revolution in science. Originally published in 1983. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Learning with Information Systems

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical

approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.
