A fascinating and nostalgic compilation of
rider profiles written over a three year period,
which originally appeared in *Classic
Motorcycle* magazine, and is now
accompanied by a new set of over 100
photographs. All of the riders featured became
top achievers in their field, although, for some,
it was their first interview. During the 1950s
and 60s, scrambling especially drew huge
crowds to meetings all across the country, and,
thanks to TV coverage such as BBC
Grandstand Trophy, and ITV's World of
Sport, many of the competitors featured in this
book became household names. Each chapter

includes the competition years of the riders, and
also gives an overview of their careers, and
conveys their enthusiasm for the sport.

virtually everyone who owns a motorcycle will

motorcycle expert Tracy Martin provides

This *How to Restore Norton Commando* manual

is aimed at owners and enthusiasts of the legendary

Norton Commando, and covers all areas of

restoration from the sourcing of the bike to its
completion as a fully restored machine. Starting
with advice on the different models, spares
availability and where best to source a bike to
restore, the book then covers the complete
dismantling and restoration of the bike. Describing
the engine, frame, gearbox, wheels, suspension and
forks, brakes, ancillaries, bodywork, and electrics,
the text is illustrated with hundreds of clear colour
photos. What really sets this manual apart is the
style in which it is written: not as some dull and
distant workshop manual but in a friendly,
humorous manner by an enthusiast of many years
who is able to involve and entertain the reader, as
well as providing a thorough and detailed
restoration guide. This is the fourth restoration
guide from an author whose previous works have

How to Build a Motorcycle leads you through all the key stages - from initially finding the right project for your skill level, to sourcing a base bike and safely taking on some full-on bike-building tasks. With clear, easy-to-follow instructions, proper advice and specially commissioned step-by-step illustrations throughout it is an ideal aid to getting your hands oily. Written by Gary Inman, the co-founder of independent motorcycle magazine Sideburn, and illustrated by Adi Gilbert who is best known for his bicycle and motorcycle drawings whose clients include Harley-Davidson, Guy Martin, Wired magazine, Sideburn magazine and Nike, this is a must-have for all motorcycle lovers. Read this book, even dip in and out where relevant. If it makes sense, schedule some time, clear your mind, pull on some old clothes, grab your toolbox and get going. The chapters in How to Build a Motorcycle will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and

start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Even though these require relatively little work, they'll transform the look of your bike, and completing them will fill you with confidence to undertake the more difficult jobs, such as fitting more modern front forks or even making your own frame. The book comes with a glossy 32-page section on finished bikes and is a reference and the perfect gift for all fans, from those who merely like to tinker, to riders taking on a full build.

The book will be produced with the full co-operation of JCB, who are likely to take approx 2,000 copies to use for promotional activity to celebrate the company's 70th anniversary in October 2015 (a year of celebrations is planned running until October 2016). JCB has an extensive archive from which material will be drawn for use in the book, and it is envisaged that the 'project vehicle' will be a 'classic' 1979 3C Backhoe Loader - revered by enthusiasts, and the machine that took JCB from leading British manufacturer to a global player.
