50 Ways to Play, Laugh, and Connect Zondervan

From Snow White to Shrek, from Fred Flintstone to SpongeBob SquarePants, the design of a character

conveys personality before a single word of dialogue is spoken. Designing

Characters with Personality shows artists how to create a distinctive character, then place that character in

context within a script, establish hierarchy, and maximize the impact of pose and expression. Practical

exercises help readers put everything together to make their new characters sparkle.

Lessons from the author, who designed the dragon

Mushu (voiced by Eddie Murphy) in Disney's *Mulan*—plus big-name experts in film, TV, video games, and graphic novels—make a complex subject accessible to every artist.

This book, in a user-friendly format, is an ideal introduction to pediatric diagnostic imaging. It presents 100 cases drawn from clinical practice that range from commonly encountered disorders to complex and infrequent situations which must be recognized by the practitioner. Each case serves to identify essential imaging features of the pathology under consideration and will assist the reader in diagnosing similar cases. The book is divided into ten chapters, each comprising ten cases that are presented in a standard way. After discussion of the disorder in question, four representative images are displayed and described with special attention to distinctive features. In addition, informative key references are provided, including a book or book chapter, a web link, and ten recent articles.

Immortalized as Dustin Hoffman's transport in *The Graduate*, the Alfa Romeo Spider enjoyed an extraordinarily long production span of 27 years. Launched as the 1600cc Duetto with Pininfarina's simply-styled round-tailed body, it got a 1750cc engine and a boxed off tail in 1969, grew into a 2000cc in 1970 and was saddled with rubber bumpers in the 1980s, but mercifully lost them in 1990. Chris Rees has assembled a comprehensive production history of the car that was offered in literally dozens of different versions with a bewildering multiplicity of minor changes and variants. This task has never been properly attempted before, and the result is sure to be eagerly seized upon by the thousands of Spider enthusiasts hungry for a definitive volume.

All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's *AmGov: Long Story Short*, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, *AmGov*

provides a perfectly simplified foundation for a successful American Government course. *AmGov* Elsevier

How Attachment Shapes Our Lives Cengage Learning
This volume covers a wide range of approaches to fundamental questions about music, such as: What is similarity in

music? How do we recognize it? How can we program computers to recognize it? Topics include concepts and procedures, tools and applications, human melodic judgments, and online tools for melodic searching. The contributors draw on theoretical approaches and practical results from computer science and network models, folk-music archives and bibliographical collaborations, algorithmic composition, classical-music history, ethnomusicology and social psychology, and case law in claims of popular music plagiarism. Contributors: David Bainbridge, David Cope, Tim Crawford, Charles Cronin, Ewa Dahlig, Dominik Hörnel, John Howard, Costas S. Iliopoulos, Andreas Kornstädt, Rodger J. How difficult it can be to forgive others or to accept forgiveness or to accept that someone who had offended the community has been reconciled and accepted back into it. For two millennia Christians have pondered the scope of the forgiveness Jesus taught and lived. They have celebrated practices and rites that have enabled the faithful to forgive, to be forgiven, and to accept that God brings reconciliation even when we find it almost impossible to forgive.

This book traces that history to the present, offering a sense not only of how the rites of reconciliation matter to Catholics but how our

struggles with forgiveness are a real contribution to reconciliation in our world.
