Russian Spetsnaz Officer Vanya Volchitza leaves the Russian Federation on good terms after achieving successful careers as a university instructor, special agent, and chief executive of Baron Oil and after losing her lover and a number of near-fatal encounters with Chinese assassins sent to kill her for former actions against the PRC, including assassinations of high-level Chinese state security ministers. She lands in Israel intent on finding peace and security but becomes involved with Mossad, Israel's intelligence service, in combatting terrorists from the nearby Gaza territory attempting to smuggle operators into Israel through a forgotten utilities tunnel. Meantime, China's new Belt and Road initiative has led them to make substantial investments in Gaza's infrastructure. A special team is sent to oversee the investments and learns that the long-sought assassin Ya Ying is thought to be located in nearby Israel. China's huge standing reward for her, dead or alive, prompts the Gaza team of Chinese agents to relentlessly pursue her, involving covert operations through the tunnel and by sea to kill her.

A big-picture look at the history and principles influencing the Anglo-American institution of the law of land, this casebook provides the core materials for a property course, updated with new cases and materials to reflect the ever-changing law. The format of Property allows for a variety of teaching methods and applies easily to courses ranging from three to six hours. The eighth edition expands its treatment of regulatory takings and environmental justice, and its coverage of Russian property law enriches the discussion of property as an institution. This edition retains estates material, emphasizing historical development, with additional cases and notes to show the extent to which the past governs the present. Property also includes new cases on the law of condominiums and landlord/tenant law, as well as updated coverage of

easements, profits, covenants, land use regulation, and land transfer and finance.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

This study of CAMI Automotive, a unionized joint venture between General Motors and Suzuki, is the most comprehensive ever undertaken of a lean production plant. James Rinehart, Christopher Huxley, and David Robertson address a topic that has inspired fierce debate in industrial relations, sociology, labor studies, and human resource management. Heralded as a model of lean production when it opened in 1989, CAMI promised workers something different from traditional plants—a humane environment, empowerment, and cooperative labor-management relations. However, the enthusiasm workers felt during the orientation and early phases of production steadily declined, as did their involvement in participatory activities. Workers came to describe CAMI as "just another car factory." Union challenges and shopfloor resistance to key elements of the lean system grew, capped by a five-week strike in 1992. The authors attribute workers' disillusionment to lean production itself rather than to North American managers' inadequate implementation.

This guide is intended for use by members of the law enforcement community who are responsible for the examination of digital evidence. The guide, published as an NIJ Special Report, is the second in a series of guides on investigating electronic crime. It deals with common situations encountered during the processing and handling of digital evidence and can be used to help agencies develop their own policies and procedures. This guide is intended for use by law enforcement officers and other members of the law enforcement community who are responsible for the examination of digital evidence. This guide is not all-inclusive. Rather, it deals with common situations encountered during the examination of digital evidence. It is not a mandate for the law enforcement community; it is a guide agencies can use to help them develop their own policies and procedures. Technology is advancing at such a rapid rate that the suggestions in this guide are best examined in the context of current technology and practices. Each case is unique and the judgment of the examiner should be given deference in the implementation of the procedures suggested in this guide. Circumstances of individual cases and Federal, State, and local laws/rules may also require actions other than those described in this guide. When dealing with digital evidence, the following general forensic and procedural principles should be applied: ? Actions taken to secure and collect digital evidence should not affect the integrity of that evidence. ? Persons conducting an examination of digital evidence should be trained for that purpose. ? Activity relating to the seizure, examination, storage, or transfer of digital evidence should be documented, preserved, and available for review. Through all of this, the examiner should be cognizant of the need to conduct an accurate and impartial examination of the digital evidence. How is digital evidence processed? Assessment. Computer forensic examiners should assess digital evidence thoroughly with respect to the scope of the case to determine the course of action to take. Acquisition. Digital evidence, by its very nature, is fragile and can be altered, damaged, or destroyed by improper handling or examination. Examination is best conducted on a copy of the original evidence. The original evidence should be acquired in a manner that protects and preserves the integrity of the evidence. Examination. The purpose of the examination process is to extract and analyze digital evidence. Extraction refers to the recovery of data from its media. Analysis refers to the interpretation of the recovered data and putting it in a logical and useful format. Documenting and reporting. Actions and observations should be documented throughout the forensic processing of evidence. This will conclude with the preparation of a written report of the findings.

Now a New York Times bestseller and a major docuseries The 2017 American Book Award Winner from the Before Columbus Foundation A Washington Post notable nonfiction book for 2016 A Goodreads Best of 2016 Nonfiction Finalist A Kobo Best Book of 2016 Includes an update from Rabia on Adnan's vacated murder conviction in summer 2016 Serial only told part of the story... In early 2000, Adnan Syed was convicted and sentenced to life plus thirty years for the murder of his ex-girlfriend Hae Min Lee, a high school senior in Baltimore, Maryland. Syed has maintained his innocence, and Rabia Chaudry, a family friend, has always believed him. By 2013, after almost all appeals had been exhausted, Rabia contacted Sarah Koenig, a producer at This American Life, in hopes of finding a journalist who could shed light on Adnan's story. In 2014, Koenig's investigation turned into Serial, a Peabody Award-winning podcast with more than 500 million international listeners But Serial did not tell the whole story. In this compelling narrative, Rabia Chaudry presents new key evidence that she maintains dismantles the State's case: a potential new suspect, forensics indicating Hae was killed and kept somewhere for almost half a day, and documentation withheld by the State that destroys the cell phone evidence -- among many other points -- and she shows how fans of Serial joined a crowd-sourced investigation into a case riddled with errors and strange twists. Adnan's Story also shares Adnan's life in prison, and weaves in his personal reflections, including never-before-seen letters. Chaudry, who is committed to exonerating Adnan, makes it clear that justice is yet to be achieved in this much examined case.

Timeless On The Silk Road is a travel memoir based on one woman's solo motorcycle odyssey along the fabled Silk Roads of antiquity. Faced with her mortality, this is a profoundly confronting tale of life and death. An evocative journey of courage, hardship and immense beauty of landscape and culture, Heather brings to life every character she meets along the way. She pays homage to the fallen ANZACs; crosses oil-rich Azerbaijan and the Caspian Sea. In Turkmenistan and Uzbekistan, she enters the ancient world of Islam, then rides over the high snow-capped mountain passes to the lush valleys of Kyrgyzstan where the nomads take her into their yurts and their hearts. She becomes lost in the vastness of the birch forests of Kazakhstan's Altai Mountains where she is rescued by Russian mountain men. And in China, she is repeatedly told there will soon be a new world order. Timeless On The Silk Road is essentially the story of one woman's last adventure; her one last search for meaning as she navigates the pendulum of denial and hope: depression and faith. But it is through this search that the narrative is infused with a deep spiritual power leaving the reader questioning their own mortality and leaving them with a deeper understanding of what it means for the millions globally living with HIV; for the newly diagnosed; and for those, without access to effective treatments, continue to die from AIDS. Timeless on the Silk Road is Heather's eagerly anticipated second book and follows Ubuntu: One Woman's Motorcycle Odyssey Across Africa, a travel memoir about a life-changing adventure into the soul of Africa. Published by Black Inc in April 2016 and Illuminatio in Poland in June 2017, Ubuntu has received rave reviews in Australia and internationally, and continues to be listed as a 'Bestseller' in travel on Amazon. Heather has worked as a radiation safety technician, a motorcycle courier in London, a journalist and in communications in international community development. She lives in the Yarra Valley, Australia with her three children. And she still rides motorcycles.

This book is the first major study of one of Spain's most celebrated younger novelists, Belén Gopegui, whose work stands apart from other writers of her generation for its uncompromising focus on the social function of literature. Gopegui's social commitments find expression in her concern for solidarity and collective projects. These become more radical over time in response to a disenchantment with the evolution of the left in Spain and to the global impact of the capitalist economic system, giving rise to increasingly interventionist narrative strategies. The core theme of solidarity is explored in relation to the collective experience of Spain's largely consensual democratic transition and to the apparent

erosion of collective goals in post-transition society. Gopegui's discourse of solidarity is examined through engagement with theorists of advanced modernity, including Ulrich Beck's 'risk society' model and various contemporary reflections on the concept of solidarity. Centred on Gopegui's first four novels, the study situates analysis of these within the perspective of her later works and illuminates her artistic and intellectual trajectory by drawing on an extensive array of her non-fiction writings and personal interviews, one of which is published here for the first time. Hayley Rabanal is Lecturer in Hispanic Studies at the University of Sheffield.

This section of the manual provides information related to: \* Examination requirements for the vision, knowledge and road tests \* Traffic signs, signals, and lane markings \* Basic Rules of the Road \* Being a responsible driver and knowing the dangers and penalties of Driving Under the Influence of alcohol and drugs. Section C This section provides information and safety tips to improve the knowledge of all highway users to minimize the likelihood of a crash and the consequences of those that do occur. This section consists of pages 91-117. It also provides information about sharing the road with other methods of transportation, which have certain rights and privileges on the highways which drivers must be aware of and respect. It is important to read this information and learn what you can do to stay safe, and keep your family safe, on the streets, roads and highways of our great state.

*NIJ Special Report, Forensic Examination of Digital Evidence: A Guide for Law Enforcement, April 2004*  
In 1985, Charles Ng and Leonard Lake were spotted shoplifting. Ng escaped, but Lake's capture led police to a concrete bunker in the Sierra Nevada foothills, where they discovered the grisly evidence of an orgy of sex crimes, torture and murder that claimed at least sixteen victims. Lake committed suicide: Ng fled to Canada, where he was tracked down and extradited to California. This 14-year, \$10 million legal case was the costliest and longest criminal prosecution in California history.
