An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific

research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Welding is a skill that any do-it-yourself enthusiast needs in his or her arsenal.

How to Weld is the perfect introduction for newbies and an excellent refresher for veteran welders--a work so comprehensive that most readers won't need any further instruction.

In How to Weld, a bestselling installment in the

Motorbooks Workshop series, AWS-certified welding instructor Todd Bridigum

thoroughly describes process and art of fusing metals, including: Tools and

equipment commonly used Types of metals and their weldability Welding

techniques Shop and site safety Types of joints. In addition, all popular types

of welding variants are covered, including gas welding, shielded metal arc (or

stick) welding, gas metal arc welding (MIG), gas tungsten arc welding (TIG),

brazing, soldering, and even metal cutting. Each skills section concludes with a

series of exercises, each illustrated with captioned sequential color

photography, to fully explain and detail the techniques learned. Mechanics,

automotive enthusiasts, farmers, metalworkers, and other DIYers who can't

bond metal can't make repairs and they can't create—in short, they can't do

much of anything except bolt together pre-made parts. With this thorough and

completely illustrated all-color tutorial by an experienced college-level

instructor, readers can get on the path fabricating and fixing metals on their

own. How To Weld is the only book about welding they'll ever need. The

Motorbooks Workshop series covers topics that engage and interest car and

motorcycle enthusiasts. Written by subject-matter experts and illustrated with

step-by-step and how-it's-done reference images, Motorbooks Workshop is

the ultimate resource for how-to know-how.
