Part-time racer and chicken farmer Carroll Shelby ordered a chassis from AC Cars in England in 1961, and asked them to install a Ford V8 engine in it. The AC Ace was fitted with the same rear diff as that used in the Jaguar E-type, and so when the car arrived in the Shelby workshop, it proved easy to modify thanks to the simple AC layout.

An award-winning scientist
offers his unorthodox
approach to childrearing:
“ Parentology is brilliant, jaw-
droppingly funny, and full of
wisdom...bound to change
your thinking about parenting
and its conventions ” (Amy
Chua, author of Battle Hymn
of the Tiger Mother). If
you ’ re like many parents,
you might ask family and
friends for advice when faced
with important choices about
how to raise your kids. You
might turn to parenting books
or simply rely on timeworn
religious or cultural traditions.
But when Dalton Conley, a
dual-doctorate scientist and
full-blown nerd, needed
childrearing advice, he turned
to scientific research to make
the big decisions. In
Parentology, Conley
hilariously reports the results

of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley 's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ' ll be

laughing and learning at the same time.

The city seen from a unique point of view: those who want to break in and loot its treasures At the heart of Geoff Manaugh's *A Burglar's Guide to the City* is an unexpected and thrilling insight: the city as seen through the eyes of robbers. From experts on both sides of the law, readers learn to understand the city as an arena of possible tunnels and picked locks—and architecture itself as

an obstacle to be outwitted and second-guessed. Never again will readers enter a bank without imagining the vault geometry, or visit a museum without plotting ways to bring their favorite painting home with them. From how to pick locks (and the tools required) to how to case a bank on the edge of town, readers will learn to spot the vulnerabilities, blind spots, and unseen openings that surround us all the time. This simultaneously allows us to view the city—from specific buildings and individual rooms to whole neighborhoods—through the privileged eyes of FBI investigating agents and security consultants, people dedicated both to solving and to preempting these attempts at devious entry. Full of absurd and marvelous stories of heists and capers, and offering a kind of criminal X-ray of the built environment, *A Burglar's Guide to the City* includes its own twist: the realization, hidden in its final chapter, that all along the book has been laying out the relevant details for plotting the perfect robbery, an ambitious and real

proposal for robbing a bank in New York City.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to

dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Asian American women have long dealt with charges of betrayal within and beyond their communities. Images of their "disloyalty" pervade American culture, from the daughter who is branded a

traitor to family for adopting American ways, to the war bride who immigrates in defiance of her countrymen, to a figure such as Yoko Ono, accused of breaking up the Beatles with her "seduction" of John Lennon. Leslie Bow here explores how representations of females transgressing the social order play out in literature by Asian American women. Questions of ethnic belonging, sexuality, identification, and political allegiance are among the issues raised by such writers as Jeanne Wakatsuki Houston, Bharati Mukherjee, Jade Snow Wong, Amy Tan, Sky Lee, Le Ly Hayslip, Wendy Law-Yone, Fiona Cheong, and Nellie Wong. Beginning with the notion that feminist and Asian American identity are mutually exclusive, Bow analyzes how women serve as boundary markers between ethnic or national collectives in order to reveal the male-based nature of social cohesion. In exploring

the relationship between femininity and citizenship, liberal feminism and American racial discourse, and women's domestic abuse and human rights, the author suggests that Asian American women not only mediate sexuality's construction as a determiner of loyalty but also manipulate that construction as a tool of political persuasion in their writing. The language of betrayal, she argues, offers a potent rhetorical means of signaling how belonging is policed by individuals and by the state. Bow's bold analysis exposes the stakes behind maintaining ethnic, feminist, and national alliances, particularly for women who claim multiple loyalties.
