The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

The fluidized-bed reactor is the centerpiece of industrial fluidization processes. This book focuses on the design and operation of fluidized beds in many different industrial processes, emphasizing the rationale for choosing fluidized beds for each particular process. The book starts with a brief history of fluidization from its inception in the 1940 's. The authors present both the fluid dynamics of gas-solid fluidized beds and the extensive experimental studies of operating systems and they set them in the context of operating processes that use fluid-bed reactors. Chemical engineering students and postdocs as well as practicing engineers will find great interest in this book.

TRANSLATOR' S INTRODUCTION We would like to begin by thanking Doshu Ueshiba Kisshomaru and the Aikikai Foundation for making this family treasure available for publication. We also wish to express our appreciation to those teachers who gave their invaluable help in explaining difficult passages. Due to the historical nature of this work certain difficulties arose, especially in deciding to what degree we should try to produce clear and precise English. Any precise translation could easily become a personal translation, limiting the contents and range of the translator's individual understanding at this particular point in his or her training. Therefore, after consulting some of the highest Sensei in Aikido and other arts it was decided to strive for a translation that would both preserve the simplicity of the original expression and at the same time leave open to the reader at least the possibility of coming up with the broad set of ideas and associations indicated in the Japanese. This book appeared in 1933 and is the first published account of O-Sensei's art. Although not actually written down by him, it is a transcription of lectures and explanations which was later reviewed by the founder and approved as a teacher's manual. The political and historical context of the times should be kept in mind. No attempt has been made to edit the text. The original copy has O-Sensei's title which was simply "Budo Renshu", i.e. "Budo Training". Later the second Doshu annotated this with the word "Aikido". The Dojo decided on using the original name here despite the fact that most Japanese copies are entitled Aikijujutsu Ogi", or "The Secrets of Aikijujutsu". The latter is actually an interpretive heading used by the copyists. The original was hand-written and illustrated. Later this was copied out several times, using tracing paper to reproduce the illustrations. During this process errors easily crept in. By comparing various copies, most of the poems could be deciphered despite their flowery writing style. However only a few

of the tracing mistakes have been corrected here. In other cases the terms 'left' and 'right' had been reversed. This seems to be the result of confusing Nage's point of view Uke's. In this edition these obvious errors have been corrected to match the illustrations. The poems presented the biggest problems. Much effort was spent to offer the reader a translation which presents as closely as possible the same degree of lee- ay for interpretation, insight and error, as appears in the original. Two versions are offered. One reflects the 5-7-5-7-7 syllabic structure of five line, Japanese Waka poetry. Each line in English contains the same groups of words found in the corresponding line of Japanese. The second attempt is to put the poem into a somewhat clearer English syntax. Another interesting point about the poems is that not all of them are original compositions of O-Sensei. At least a few can be traced to other martial traditions. Please note that the parentheses indicate the insertion, for your reference, of a Japanese word used in the text for the preceding English word (except for a few cases in the technique section where O-Sensei used parentheses in the original). Square brackets are the translator's insertions for the sake of the English. By simply deleting the sections enclosed by them, they allow readers to refer to O-Sensei's exact words, if they choose to do so. Although not for the beginner, it is hoped that access to this historically important text will be useful in understanding Aikido and its origins for those who have taken Budo as their 'Way'. The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. Its easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

This Open Access volume explains how major nuclear and radiological emergencies (NREs) can have implications at local, national and international level. The response to NREs requires a competent decision-making structure, clear communication and effective information exchange. National veterinary services have the responsibility to plan, design and manage animal production system in their countries. These activities cover animal health, animal movement control, production control and improvement, and control of the products of animal origin before their placement on the market. Release of radionuclides after NREs can cause substantial contamination in the animal production systems. Critical responsibility of veterinary authorities is therefore to prevent such contamination, establish early response mechanisms to mitigate the consequences and prevent placement of contaminated products of animal origin on the market for human consumption. This work summarizes the critical technical points for effective management of NREs for national veterinary services.
