Giving IT professionals in financial services firms a rounded and comprehensive grounding in their knowledge of their industry, this book offers a primer on the major financial instruments, transactions, and processes, as well as a sound knowledge of the principles of good IT management in the industry. The book gives readers a clear understanding of equities, bonds, currencies, listed derivatives and OTC derivatives. It explains transactions in those instruments and the requirements of business systems that process these transactions. Transactions covered include (inter alia) agency and principal purchases and sales, loans and deposits, repos and reverse repos, stock loans; and also the Sharia-compliant 'Islamic' transactions that may be used as alternatives to interest bearing transactions. Andrew Bradford gives an introduction to how investment firms are regulated; offers an understanding of the STP (Straight-through-Processing) concept following the trade cycle for the transactions from order through to execution through pre-settlement to final settlement; covers basic accounting procedures for the transactions; and conveys the basic principles of good IT management in the investment industry.

The 1st edition of Back Office and Beyond became the benchmark source and reference for 'best practice' in back office procedures. Better attention to back office procedures would have prevented disasters at Barings, Sumitomo, and other causes celebres - not to mention the latest debacle at Allfirst in the USA. This ground breaking book is an essential read for anyone wanting his/her organisation to thrive and survive, containing particularly practical guidance and advice and now extends its cover to the implications of CAD II. There is a compelling requirement for aspects of risk to be

situated in the Back/Middle Office areas. Indeed, they should be involved at first base: for if data is not captured accurately, there is little chance of the institution's risk profile being accurate. With so many banks offering similar products and pricing, accurate and speedy settlements have become a competition issue not to be ignored. As an additional reason for purchase, this edition now offers a guide to Equities' settlement also.

It is inherent in some creatures living in nature to take what is not his own. Getting the ready one without working, getting rich the easy way! Since the earliest times in history it has been more attractive and tempting for some people or groups of people to take what others produce by force rather than work and produce. This has always been the cause of the turmoil, Wars and invasions among people since the early ages. In the past, this was done by force and physical force, today it is done as an idea, namely by deception and deception. In order to combat fraudsters, it is necessary to know the techniques and methods they use. In this book, we tried to give some experience to this subject and to give some experience to protect the traders. For this purpose, we tried to give primarily the techniques used, the areas where fraud occurred, case studies and ways of protection.

This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or 'wires' for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network

in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business history.

The only comprehensive account of operational risk in securities settlements Securities Operations focuses on the settlement aspects of a securities transaction. As financial analysts make a greater effort toward quantifying and managing operational risk, they are paying more attention to securities transactions in general and to the settlement phase in particular. While describing the practical issues, this book enumerates the different "back office" related risks potentially encountered throughout the settlement. Simmons also covers more advanced topics such as derivatives, trade compensation, internal allocation of funding costs, and operational performance measurement. Michael Simmons (London, UK) is currently Head of Business Consultancy at Wilco International, a major software systems provider to the financial markets. Over the years, financial professionals around the world have looked to the Wiley Finance series and its wide

Being able to make and receive payments is an essential facet of modern life. It is integral to the banking and finance systems, and it touches all global citizens. In some areas, payment systems are rapidly evolving – moving swiftly from paper payment instruments, to electronic, to real-time – but in others, underdeveloped payment systems hold back economic and social development. This book is intended to assist the reader in navigating the payments landscape. The author explores highly topical areas, such as the role of payment systems in enabling commerce to contribute to the development of emerging economies, the evolution of payment systems from paper instruments to computerization, the role of cryptocurrencies, and the slow decline of plastic credit and debit cards owing to alternative forms of payment being introduced. Altogether, this book provides a comprehensive overview of the evolution of payment and offers projections for the future, encouraging readers to explore their own predictions, using the framework that the book has provided. It is vital reading for technologists, marketers, executives and investors in the FinTech sector, as well as academics teaching business and technology courses.

Trade Finance provides a much-needed re-examination of the relevant legal principles and a study of the challenges posed to current legal structures by technological changes, financial innovation, and international regulation. Arising out of the papers presented at the symposium, Trade Finance for the 21st Century, this collection brings together the perspectives of scholars and

practitioners from around the globe focusing on core themes, such as reform and the future role of the UCP, the impact of technology on letters of credit and other forms of trade finance, and the rise of alternative forms of financing. The book covers three key fields of trade finance, starting with the challenges to traditional trade financing by means of documentary credit. These include issues related to contractual enforceability, the use of "soft clauses", the doctrine of strict compliance, the fraud exception, the role of the correspondent bank, performance bonds, and conflict of laws problems. The second main area covered by the work is the technological issues and opportunities in trade finance, including electronic bills of exchange, blockchain, and electronically transferable records. The final part of the work considers alternative and complementary trade finance mechanisms such as open account trading, supply-chain financing, the bank payment obligation, and countertrade.

If you think that the rules of the International Chamber of Commerce (ICC), Paris on trade finance and documentary credits have no surprises left for you, then read this book very carefully from cover to cover.

Whether you are a trade finance veteran or a recent entrant, the articles in this book will provide you with a few unconventional and unusual perspectives about the UCP and the ISBP rules. The book discusses selected provisions of UCP 600, and also raises several pertinent questions. For example, does the SWIFT MT700 really provide for an expiry date? Is article 15 necessary? Why shouldn't UCP sub-article 16(f) apply to a nominated bank? Did you know that UCP article 10 on amendments has a huge logical error? Why are some critical rules missing in the UCP (they are only in the ISBP)? Are you aware that sub-articles 14(g), and 14(h) on non-documentary conditions, are both incorrectly structured? Which ICC 'rules' apply if a presentation contains only copies of transport documents? Must a B/L or a MMTD show a date of issue? What is 'negotiation'? Why is the place where a credit is available of critical importance to an exporter/beneficiary? Go ahead and read the book. It will provide you with plenty of food for thought, a

deeper understanding of the rules of trade finance, and value for money.
