How to Switch From a PC to a Mac - [businessnewsdaily.com](http://businessnewsdaily.com)

Mac malware does exist—it ' s naive to think otherwise. To protect your system from malware, it ' s best to avoid unsigned apps, favor the Mac App Store, and steer clear of pirated or cracked software. You don ' t need an antivirus as your Mac already runs a low-level one called XProtect (you can learn more about it here).
