The landscape of academic surgery has become increasingly complex. Young academic surgeons are now confronted with the task of juggling administrative, clinical, educational, and research responsibilities. While decades ago young faculty would look toward a single " triple threat " mentor, trainees and young junior faculty now must assemble a team of mentors who can help him/her craft a career trajectory for success in academia. In addition, with the emergence of team based science and an emphasis on clinical " crew management " faculty now must hone their leadership skills to be effective in the research and clinical environment. While many books focus on specific research or technical surgical topics, there is a need for an accessible, user-friendly text on the subject of surgical mentorship and leadership. In particular, there is a strong desire among trainees and young surgeons to learn about mentorship, as well as define leadership tools. Currently, there is a gap in the market for a definitive reference on surgical leadership and mentorship. This text will provide a comprehensive, state-of-the art definitive reference on surgical

Including considerations of sustainability in universities ’ activities has long since become mainstream. However, there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula. Among the problems that hinder progress in this field, the lack of sound information on how to actually implement it is prominent. Created in order to address this need, this book presents a wealth of information on innovative approaches, methods and tools that may be helpful in translating sustainability principles into practice.
