Proceedings of ICMLIP 2020 Communicating a message effectively needs precision—be it verbal or non-verbal. At the professional front, the accuracy of the message to be shared becomes all the more important as the business decisions may depend on the same. This book, in its second edition, continues to detail on the pre-requisites of communicating effectively in the corporate environment and generally. Beginning with an overview of business communication, the book educates on the principles of communication—oral and written. Divided into nine chapters, the first two chapters deal with oral communication and the next seven deal with different forms of written communication. The book teaches how to write effective letters and prepare persuasive resumé. The chapters are well-supported with many examples and illustrative exhibits wherever required. A new chapter (Chapter 9) has been added titled ‘Writing to Communicate’ which presents incorrect use of language and phrases that rob the text, be it a report or a letter, of authenticity and credibility. The chapter also presents correct use of the examples and the rationale or logic in the form of explanations. Designed as a textbook for the management students, this book would be equally useful to policy makers to better understand the historical context of tribal societies for whom new policies are being supported.

Bhimrao Ramji Ambedkar, popularly known as Dr. Babasaheb Ambedkar, was an Indian jurist, economist, politician and social reformer who inspired the Dalit Buddhist movement and campaigned against social discrimination towards the untouchables, while also supporting the rights of women and labour.

An Introduction to Financial Management

This book provides comprehensive information on enlargement of methodological and empirical choices in a multidisciplinary perspective by breaking down the monopoly of possessing tribal studies in the confinement of conventional disciplinary boundaries. Focusing on anyone of the core themes of history, archaeology or anthropology, the chapters are suggestive of grand theories of tribal interaction over time and space within a frame of composite understanding of human civilization. With distinct cross-disciplinary analytical frames, the chapters maximize reader insights into the emerging trend of perspective shifts in tribal studies, thus mapping multi-dimensional growth of knowledge in the field and providing a road-map of empirical and theoretical understanding of tribal issues in contemporary academics. This book will be useful for researchers and scholars of anthropology, ethnography, ethnoarchaeology, and allied subjects like sociology, social work, geography who are interested in tribal studies. Finally, the book can also prove useful to policy makers to better understand the historical context of tribal societies for whom new policies are being created and implemented.

Evaluation Planning, Design and Implementation, and Utilization of Evaluation Results

An Introduction to Financial Management

This book constitutes the refereed proceedings of the 53rd Annual Convention of the Computer Society of India, CSI 2020, held in Bhubaneswar, India, in January 2020. The 3 revised full and 7 revised short papers, along with 1 poster paper, presented were carefully reviewed and selected from 144 submissions. The theme of CSI 2021, Digital Democracy – IT for Change, was selected to present the use of information and communication technology (ICT) in political and governance processes. The papers focus on topics such as digital democracy, digital communication, digital analytics and digital security.

An Elementary Survey

**Principles of Environmental Studies** Walter de Gruyter
This book presents a comprehensive treatment of the subject of evaluation as applied to literacy programs, covering evaluation theory, planning, and practice. Part I discusses questions of definition, context, objectives, and functions of evaluation and presents descriptions and analyses of evaluation paradigms and models. In Part II, the interrelated processes of evaluation planning and management are discussed, and evaluation planning and management approaches are explained and demonstrated. Parts III, IV, and V focus on the three components of the evaluation management approach discussed in Part II: management information systems (MIS), naturalistic evaluation (NE), and rationalistic evaluation (RE). Chapters in these parts cover: (1) theory, questions, and design of an MIS, NE, or RE; (2) writing a proposal for an MIS or for an evaluation study in the naturalistic or rationalistic mode; (3) tools and techniques of the three approaches; and (4) writing periodical and special reports. Part VI discusses the politics of evaluation, the need to establish evaluation standards for meta-evaluations, and the related question of evaluators' training. A glossary is appended. (YLB)
