Most avid sky gazers wait until nightfall to catch a glimpse of the stars that are scattered across the heavens. The fact of the matter is that one needs only to feel the Sun's rays in order to experience the presence of a star. The Sun is an ordinary star, a ball of hot gas much like millions of others in the universe, but as the center of the solar system, it is critical to the survival of all life forms on Earth. This comprehensive volume examines the nature of the Sun and details the properties and types of various stars, as well as the greater galaxies of which they are a part.

Scientific Study from the year 2011 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, Bangalore University / Central College (Dayanada Sagar College of Engineering), language: English, abstract: In this study the effectiveness of brand tracking through social media was studied. This study is of much significance to the brand managers for future application of social media channels. Social media is centered on communities where users share their opinion and gain others perspective unlike traditional media where the company sends unidirectional messages to the audience. Social media requires the consent of the user and is more acceptable as compared to traditional media which infiltrates the personal space of a person. Social media is basically shared media where brands can simulate discussions at regular intervals but the final result of

the discussion can have either positive or negative impact on the brands. Social media scores in targeting the message to the right audience. It enables marketers to focus on their target segment instead of broadcasting the message to mass audience. The media lays emphasis on engagement with the customer and builds a relationship which is long lasting.

The first person who will live to be 150 years old has already been born. The screen that we peer into will soon be within us. We could soon be taking happiness pills before breakfast. The perfect partner might need to be charged before bed. This is a new world we are walking into. And the man who began this journey won't be the man who ends this journey. Where Will Man Take Us? explores the changes technology is bringing about in us-as a society and as a species. What will the next generation turn into, what will it be like, how will the new Adam and Eve live and love? In this book, Atul Jalan tackles nanotechnology, artificial intelligence, quantum computing and genetics, seamlessly weaving the future of technology with the changing dynamics of human love, morality and ethics.

Stately oaks, ivy-covered walls, the opposite sex — these are the things that likely come to mind for most Americans when they think about the "nature" of college. But the real nature of college is hidden in plain sight: it's flowing out of the keg, it's woven into the mascots on our T-shirts. Engaging in a deep and richly entertaining study of "campus ecology," The Nature of College explores one day in the life of the average student, questioning what "natural" is and what "common sense" is really good for and weighing the collective impacts of the everyday. In the end, this fascinating, highly original book rediscovers and repurposes the great and timeless opportunity presented by college: to study the American way of life, and to develop a more sustainable, better way to live.
