This manual describes the programming

requirements and considerations for management of data-communications subsystems that support token-oriented programmatic interfaces. Included is information about the Subsystem Control Point (SCP) management process.

RTE-C Software System CRC Press

A Grain of Truth debunks the myth that growing public distrust of genetically modified organisms can be attributed to scientific illiteracy or sensationalistic news stories. Media coverage of these issues has been dominated by the spokespersons of industry_yet evidence of consumer uncertainty has been available all along. The roots of the controversy are visible in press coverage and public opinion polls over the past decade, covering everything from the manufacture of growth hormones used in dairy cows through the cloning of Dolly the sheep to the appearance of the so-called 'terminator gene.' Arguing neither for nor against genetic engineering and other forms of biotechnology, this book charges both media and industry with ignoring the concerns of the general public and encourages greater public debate over biotech and other such complex issues.
