Konica Minolta and Panasonic i-PRO developed the system through an open partnership to help detect individuals who have increased body surface temperature and those not wearing a mask as part of measures to stop the spread of infectious diseases by taking full advantage of video monitoring technology. The system supports identifying individuals who are suspected to have a fever at places where ...

Tokyo (October 14, 2020) – Konica Minolta, Inc. (Konica Minolta) today announced that the company has developed a video monitoring system in cooperation with Panasonic i-PRO Sensing Solutions Co., Ltd. ("Panasonic i-PRO") to help prevent the spread of infectious diseases by using a thermal camera for measuring body surface temperature and an application, both of which were developed by Konica Minolta.
