E-mail and computer keyboards may have replaced dictation and typewriters in the business world, but the importance of clear and effective written communication has never been greater. In her all-new book, business-writing expert Sheryl Lindsell-Roberts offers practical advice on writing messages guaranteed to get results. Drawing on her experience leading writing workshops for Fortune 500 companies, Lindsell-Roberts walks the reader through a variety of letter-writing exercises and shows how a well-crafted message can make any writer stand out in the crowd. Getting from a blank page or screen to a results-oriented message is easy with Lindsell-Roberts's proven Six Step Process. And numerous tips and reminders help make the central point that a successful message should always focus on what the primary reader needs to know. Best of all, Strategic Business Letters and E-mail is designed to save the user time and effort. Specific chapters on such areas as sales and marketing, customer relations, and personal business offer hundreds of sample letters, memos, and e-mail messages that can be used verbatim or with minimal alteration to fit a particular circumstance. Opening this invaluable book is the first step to jump-starting effective business communication.

Sales Performance Management (SPM): High-impact Strategies

- What You Need to Know CRC Press

There are many parallels between the business world and the military world: both must always be leery of the competition; both must be able to adapt to rapidly changing conditions; and if either falters the results could be devastating. Yet while military leaders have employed essentially the same strategies for thousands of years, business leaders often feel the need to try the latest fad in an effort to capture lightning in a bottle and lead the company to success. In Strategic Navigation: A Systems Approach to Business Strategy, best-selling author H. William Dettmer explains how these sound, proven strategies used by great military leaders through history can also be easily

and effectively used in the business world. Dettmer first explains how the time-tested principles of war planning and military execution can be readily applied to non-military uses, such as commercial business, not-for-profit organizations, and government agencies, leading to considerable benefits in coherence and focus. He then introduces a logical, systematic tool set to help you translate the military strategy 'template' into action, which can then be applied to nearly any industry or business type. The system described by Dettmer is relatively quick and easy to use, flexible enough to accommodate changes in the external environment, and supportive of creativity on the part of both the strategists and the executors. Finally, the book includes appendices that provide more detail on methods and some real-world examples.

Full-Spectrum Strategic

Leadership: Being on the

Cutting Edge through Innovative

Solutions, Integrated Systems,

and Enduring Relationships

articulates how strategic

leaders, senior managers, business professionals, aspiring young business leaders, and management students can make dramatic improvements in their endeavors, enrich their knowledge and capabilities, and learn the essential perspectives of strategic leadership and management. In today's world, strategic leaders regardless of venue have to be confident in their aspirations, holistic in their perspectives, proactive in their strategies and actions, and lead change ahead of the prevailing driving forces. Full-spectrum strategic leadership (FSL) is about being on the cutting edge and leading from the front and ahead of changes in the business environment. It involves creating unique solutions, developing effective and efficient systems, and building enduring relationships with people. Astute strategic leader embrace opportunities, overcome challenges, and eliminate threats before others are even aware of the underpinnings of change. They are capable, confident, and courageous when developing and deploying strategic innovations. Strategic innovations are essential in creating sustainable success and extraordinary outcomes. The book examines cutting-edge leadership and management constructs and practices. It describes how to create value across space and time and how to sustain success in a more turbulent and global business world. It explores how to lead change through insights, imagination, and innovativeness. It describes what a solution is and how to design, develop, validate, and deploy solutions that are on the cutting edge. It details how to establish integrated value systems that are inclusive and how to build enduring relationships. The book describes theories, constructs, models, insights, and practices based on multifaceted perspectives and holistic management. Given the current level of obsolescence in theories and practices in

today's business world, FSL presents cutting-edge leadership and management constructs for becoming more sophisticated and successful in a turbulent business world. Given the prevailing business realities, strategic leaders are creating, innovating, developing, improving, growing, and sustaining success or they are falling hopelessly behind. FSL is the never-ending desire to accomplish more and provide more beneficial outcomes for people. It is based on the recognition that good is never good enough, that the needs, wants, and expectations of tomorrow are expected to be more challenging than those of today, and that strategic leaders have to provide solutions to the myriad of problems, concerns and issues. It is also based on the multifaceted perspective that such challenges are really opportunities for excelling and creating value for everyone. Truly great strategic leaders provide solutions and systems that maximize the positives and minimize the negatives. They embrace corporate social responsibility, sustainability, and sustainable success. Truly great leaders make the world a better place.
