Engineering | City and County of Broomfield - Official Website

System requirements System requirements are all of the requirements requirements at the system level that describe the functions which the system as a whole should fulfill to satisfy the stakeholder needs and requirements stakeholder needs and requirements, and is expressed in an appropriate combination of textual statements, views, and non-functional requirements; the latter expressing the levels of safety, security, reliability, etc., that will be necessary.

Requirements Management – MMI Engineering  
Requirements Management vs. Requirements Engineering. To conclude, both the requirements

manager and requirements engineer are critical roles. They are both key to a project ' s success. The fundamental difference is that the requirements manager ' s tasks tend to be procedural, and the requirements engineer ' s tasks are technical and more senior in nature.
