conference in proper perspective with respect to the first conference held during October 8-10, 1992, at Polytechnic University, some background information is necessary. As we had hoped, the first conference struck a responsive cord, both in timeliness and relevance, among the electromagnetic community 1. Participants at the first conference already inquired whether and when a follow-up meeting was under consideration. The first concrete proposal in this direction was made a few months after the first conference by Prof. A. Terzuoli of the Air Force Institute of Technology (AFIT), Dayton, Ohio, who has been a strong advocate of time-domain methods and technologies. He initially proposed a follow-up time-domain workshop under AFIT auspices. Realizing that interest in this subject is lodged also at other Air Force installations, we suggested to enlarge the scope, and received in this endeavor the support of Dr. A. Nachman of AFOSR (Air Force Office of Scientific Research), Bolling Air Force Base, Washington, D.C.

This textbook provides a lively introduction to the fast-paced and multi-faceted discipline of social media management with international examples and perspectives. Aside from focusing on practical application of marketing strategy, the textbook also takes students through the process of strategy development, ethical and accurate content curation, and strategy implementation, through detailed explanations of content creation. Combining theory and practice, Strategic Social Media Management teaches students how to take a strategic approach to social media from an organisational and business perspective, and how to measure results. Richly supported by robust and engaging pedagogy and cases in each chapter, it integrates perspectives from public relations, marketing and advertising, and examines key topics such as risk, ethics, privacy, consent, copyright issues, and crises management. It also provides dedicated coverage of content

strategy and campaign planning and execution. Reflecting the demands of contemporary practice, advice on self-care for social media management is also offered, helping to protect people in this emerging profession from the negativity that they can experience online when managing an organisation's social media presence. After reading this textbook, students will be able to develop a social media strategy, curate accurate and relevant content, and create engaging social media content that tells compelling stories, connects with target audiences and supports strategic goals and objectives. This is an ideal textbook for students studying social media strategy, marketing and management at undergraduate level. It will also be essential reading for marketing, public relations, advertising and communications professionals looking to hone their social media skills and strategies.

Seven stunning stories of speculative fiction by the author of A Boy and His Dog. In a post-apocalyptic world, four men and one woman are all that remain of the human race, brought to near extinction by an artificial intelligence. Programmed to wage war on behalf of its creators, the AI became self-aware and turned against humanity. The five survivors are prisoners, kept alive and subjected to brutal torture by the hateful and sadistic machine in an endless cycle of violence. This story and six more groundbreaking and inventive tales that probe the depths of mortal experience prove why Grand Master of Science Fiction Harlan Ellison has earned the many accolades to his credit and remains one of the most original voices in American literature. I Have No Mouth and I Must Scream also includes "Big Sam Was My Friend," "Eyes of Dust," "World of the Myth," "Lonelyache," Hugo Award finalist "Delusion for a Dragon Slayer," and Hugo and Nebula Award finalist "Pretty Maggie Moneyeyes."

Librarian Jim Hahn has carefully culled the over 500,000 available apps down to the 100 that are the absolute best for day-in, day-out library services. The guide covers apps for Apple and Android devices, including tablets. Each entry in this long-needed guide contains: • a basic summary of how each app operates, • at least one example of how that app can be used by a librarian, • one example of how it can help a library user access library services, • a section highlighting critical limitations and apps that may better serve a librarian's needs, and • the next possible iteration of the app. Entries are accompanied by a photo of the app in action, so this current guide is both descriptive and visual. Introductory and final chapters cover using apps in library settings and library services as well as what the future should bring in this area. This guide is intended as an introduction for those with little or no app experience and for those wanting to know more about app uses for information access.
