Weheliye traces R&B music 's continuing centrality in Black life since the late 1970s.

Focusing on various musical production and reproduction technologies such as auto-tune and the materiality of the BlackFem singing voice, Weheliye counteracts the widespread popular and scholarly narratives of the

genre 's decline and death. He shows how R&B remains a thriving venue for the expression of Black thought and life and a primary archive of the contemporary moment. Among other topics, Weheliye discusses the postdisco evolution of house music in Chicago and techno in Detroit, Prince and David Bowie in relation to appropriations of Blackness and Euro-whiteness in the 1980s, how the BlackFem voice functions as a repository of Black knowledge, the methods contemporary R&B musicians use to bring attention to Black Lives Matter, and the

---

ways vocal distortion technologies such as the vocoder demonstrate Black music 's relevance to discussions of humanism and posthumanism. Ultimately, Feenin represents Weheliye 's capacious thinking about R&B as the site through which to consider questions of Blackness, technology, history, humanity, community, diaspora, and nationhood.

experiences as a young Marine in the 1960s, including his tour of duty in Vietnam. It also includes biographical profiles of more than 100 other Marines who fought in Vietnam or other conflicts. Most of those profiled are Marines with whom the author served or has come to know since his active military service. The 30th Marine Commandant, General Carl Mundy, has written: “ Few who have borne the title [United States Marine] fail to identify with it throughout their entire lives. ” Marines are, as Shakespeare has written, “ We few, we happy few, we band of brothers. ” And brothers are members of a family. This family is “ The few. The proud. The Marines. ”

Plunkett's Telecommunications Industry Almanac 2008: Telecommunications Industry Market Research, Statistics, Trends & Leading Companies

The smartphone was an incredibly successful Canadian invention created by a team of engineers and marketers led by Mike Lazaridis and Jim Balsillie. But there was a third key player involved — the community of Kitchener-Waterloo. In this book Chuck Howitt offers a new history of BlackBerry which documents how the resources and the people of Kitchener-Waterloo supported, facilitated, benefited from and celebrated the achievement that BlackBerry represents. After its few short years of explosive growth and pre-eminence, BlackBerry lost its market to digital juggernauts Apple, Samsung and Huawei. No

---

surprises there. Like Nokia and Motorola before it, BlackBerry was eclipsed. Shareholders lost billions. Thousands of employees lost jobs. Bankruptcy was avoided but the company's founding geniuses were gone, leaving an operation that today is only a fragment of what had been. For Kitchener-Waterloo — as Chuck Howitt tells the story — the BlackBerry experience is a mixed bag of disappointments and major ongoing benefits. The wealth it generated for its founders produced two very important university research institutes. Many recent digital startups have taken advantage of the city's pool of talented and experienced tech workers and ambitious, well-

educated university grads. A strong digital and tech industry thrives today in Kitchener-Waterloo — in a way a legacy of the BlackBerry experience. Across Canada, communities hope for homegrown business successes like BlackBerry. This book underlines how a mid-sized, strong community can help grow a world-beating company, and demonstrates the importance of the attitudes and decisions of local institutions in enabling and sustaining successful innovation. Canada has a lot to learn from BlackBerry Town. Trust, Social Relations and Engagement IGI Global With cloud computing quickly becoming a standard
