This book is the first-ever authoritative work on the use and management of humor in the workplace. It is a practical guide for everyone involved: the humorists ('jokers'), the targets (sometimes 'victims'), the observers ('audience') and most of all the managers who have to 'set the tone' and encourage, control and manage humor. Humor is part and parcel of every workplace. However, while it usually demonstrates and fosters a united, happy workforce, it can at times be deeply damaging and divisive. The authors – academics with vast organizational experience and a research-based understanding of humor at work – bring together state-of-the art knowledge of the topic, making it fun, accessible and readable for all humor participants. The topics include how humor works, humor cultures in organizations, the many forms of workplace humor and their pros and cons, humor rituals at work, digital humor, workplace jokers, the 21st century issue of 'political correctness', and both the 'bright side' of humor (assisting positive cultures, making work 'fun'), and its 'dark

side' (where humor offends and humiliates). With over 60 'real life' illustrative stories of workplace humor, a self-completion questionnaire to measure the Humor Climate in your organization, end-of-chapter 'takeaways' and an end-of-book summary advocating 'best practice', the book is a 'fun', how-to-do-it guide that will both inform and entertain.

Nicole Brossard's lucid, subversive and innovative work on language has influenced an entire generation of readers and writers. But three of her seminal works of postmodernism and feminism have been lost to us for years. The Blue Books brings them back. A Book: A novel about a novel; five characters in 'search of a narrative, a narrative in search of an author.' Brossard's first novel, and a key work in Canadian postmodernism. Turn of a Pang (Sold-out in French): Quebec's 1943 Conscriptio Crisis and the 1970 War Measures Act weave together to form the texture of a woman's life. French Kiss: a celebration of the energy of women and language in the face of the male authorities of Montreal politics and the physical authority of the printed (and bound) word. The Blue Books collects these three long-out-of-print, groundbreaking Brossard titles, in their original Coach House Press English translations (A Book by Larry Shouldice, Turn of a Pang and French Kiss by the acclaimed Patricia Claxton). Don't be blue: these Brossard classics are back!

Living in Digital Worlds investigates the relationship between human society and technology, as our private and particularly our public lives are increasingly undertaken in spaces that are inherently digital: digital public spaces. The book unpicks why digital technology is such an inextricable part of modern society, first by examining the historical relationship between technological development and the early progression of human sociality. This is then followed by an examination of the ways in which modern life is currently being impacted by the expansion of digital information and devices into multiple aspects of our lives, including focuses on privacy, bias and ownership in digital spaces. Finally, it explores potential future developments and their implications, and proposes that it is crucial to consider the design of technology and systems in order to support a positive and

beneficial direction of change. Each chapter includes case studies, primarily drawn from The Creative Exchange, a fiveyear programme which ran from 2012 to 2016 to explore the notion of the digital public space through collaborative cross-sector research.

According to dHolbach, nature is a great chain of causes and effects. Nature is the great whole, comprising everything visible and invisible. Baron d Holbach gives the laws of the physical world based on laws of motion and gravitation, as given by Newton, and he wants to apply the law of attraction and repulsion in the field of morality. All knowledge comes through the sense organs created by the impressions of the world and deposited in the brain, which is the real seat of thought. Man searches for happiness in this world, but the priesthood misguides the people by asking them to look for happiness in future life, as guided by the chimeras of religion. Man living in society should be guided by reason, experience, and sciences by working for his happiness and contributing to the happiness of other members of the society by his hard work, talent, and virtues, by being useful to others by satisfying their needs while satisfying his own needs. Happiness is on this earth, and by reason and experience, he can be happy, and not as the priesthood preaches in another future life.

The traditional urban transportation systems around the globe are now being transferred into green public transportation systems in an effort to mitigate CO2 emissions and provide nature-friendly transportation systems in cities and, ultimately, to increase citizens' wellbeing.

Furthermore, the cities are expected to transform their traditional transportation systems to cutting-edge high technology green transportation systems in the near future due to regulations applied by the related authorities such as the EU and UN. At the same time, cities are undergoing a transformation from traditional to smart cities, which is an inevitable process due to swift developments in technologies and smart systems. Sustainable public transportation systems must be developed and adjusted to be applicable in future smart cities. The Handbook of Research on Promoting Sustainable Public

Transportation Strategies in Urban Environments considers the challenges and advantages of sustainable public transportation systems in urban areas and provides relevant theoretical frameworks, the latest empirical research findings, and an overview of the latest technological developments on the subject. Covering key topics such as green vehicles, sustainability, and walkable cities, this major reference work is ideal for policymakers, government officials, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

The Age of Steel

Resurrection of the Gods (1900) is a novel by Dmitriy Merezhkovsky. Having turned from his work in poetry to a new, spiritually charged interest in fiction, Merezhkovsky sought to develop his theory of the Third Testament, an apocalyptic vision of Christianity's fulfillment in twentieth century humanity. Resurrection of the Gods, the second work in the trilogy, is preceded by The Death of the Gods (1895) and followed by Peter and Alexis (1904). Well received internationally, The Christ and Antichrist Trilogy was largely ignored by Russian critics at the time of its publication, but has since been recognized as his most original and vital literary work. " This personage was already inspecting the Venus, with a cold, imperturbable composure, so different from Giovanni's personal agitation, that the lad could not but be struck with astonishment. He continued to gaze at the statue, but his consciousness now was entirely for the man by his side. " In Resurrection of the Gods, Merezhkovsky moves his groundbreaking vision of spiritual progress and the historical development of humanity to the world of the Italian Renaissance. The novel captures a pivotal moment in the life of Leonardo da

Vinci: invited as an expert to appraise a recently rediscovered statue of Venus, the artist embarks down a path of self-discovery whereby the humanist ideals of the ancient world will reinvigorate his faith in art. With a beautifully designed cover and professionally typeset manuscript, this edition of Dmitriy Merezhkovsky's Resurrection of the Gods is a classic of Russian literature reimagined for modern readers.
