Social surveillance and regulation of knowledge will be one of the most important issues in the near future, one that will give rise to unending controversy. In The Governance of Knowledge, Nico Stehr predicts that such concerns will create a new political field, namely, knowledge policy, which will entail regulating dissemination of the anticipated results of rapidly increasing knowledge. The number and range of institutionalized standards for monitoring new knowledge has hitherto been relatively small. Only in cases of technological applications has social control, in the form of political regulation, so far intervened. All modern societies today have complex regulations and extensive concerns with the registration, licensing, testing, and monitoring of pharmaceutical products. The increasingly important and extensive area of intellectual property legislation and administration is an example of social control in which certain measures selectively determine the use of scientific finds and technical knowledge. The Governance of Knowledge assembles a range of essays that attempt to explore the new field of knowledge politics for the first time. It is divided into four parts: The Emergence of Knowledge Politics: Origins, Context, and Consequences; Major Social

Institutions and Knowledge Politics; Case Studies on the Governance of Knowledge; and Issues in Knowledge Politics as a New Political Field. Individual chapters concern the emergence of knowledge policy, the embeddedness of such regulations in major social institutions, and offer case studies of the governance of knowledge and discuss controversial issues that are bound to accompany efforts to regulate new knowledge. Professionals and graduate students in the fields of sociology, political science, social science, and law, including policymakers and natural scientists, will find this book extremely informative.

Sampson provides an unprecedented wealth of information on legitimate musical comedies, including show synopses, casts, songs, and production credits. shows performed in theatres, nightclubs, circuses, and medicine shows, this edition of *Blacks in Blackface* can be used as a reference for serious scholars and researchers of Black show business in the United States before 1940.

This book offers a close look at the discourse of and around three socially marginalised and vulnerable groups - Irish Travellers, Squatters and Homeless people - in order to understand more about how individuals within them position themselves vis-à-vis mainstream society. It investigates the groups' diverse and provisional relationship with space that challenges mainstream society's spatial logic. Given that the relationship between mobility, space and identity has been explored in migrant contexts, Roberta Piazza proposes a reconsideration of this relationship beyond people's

movement from one place to another. Investigating the space-identity nexus among the three groups, she highlights how mobility is not solely a cross-country phenomenon, but a no-less crucial and dramatic reality within an individual nation. Based on close linguistic analysis of interviews collected over many years, Piazza investigates how the participants construct their social and personal identities when talking about themselves and the sites they inhabit, drawing on the concepts of 'heterotopia' and non-sexual desire.

 This book is the first-ever authoritative work on the use and management of humor in the workplace. It is a practical guide for everyone involved: the humorists ('jokers'), the targets (sometimes 'victims'), the observers ('audience') and most of all the managers who have to 'set the tone' and encourage, control and manage humor. Humor is part and parcel of every workplace. However, while it usually demonstrates and fosters a united, happy workforce, it can at times be deeply damaging and divisive. The authors - academics with vast organizational experience and a research-based understanding of humor at work - bring together state-of-the art knowledge of the topic, making it fun, accessible and readable for all humor participants. The topics include how humor works, humor cultures in organizations, the many forms of workplace humor and their pros and cons, humor rituals at work, digital humor, workplace jokers, the 21st century issue of 'political correctness', and both

the 'bright side' of humor (assisting positive cultures, making work 'fun'), and its 'dark side' (where humor offends and humiliates). With over 60 'real life' illustrative stories of workplace humor, a self-completion questionnaire to measure the Humor Climate in your organization, end-of-chapter 'takeaways' and an end-of-book summary advocating 'best practice', the book is a 'fun', how-to-do-it guide that will both inform and entertain.

 Living in Digital Worlds investigates the relationship between human society and technology, as our private and particularly our public lives are increasingly undertaken in spaces that are inherently digital: digital public spaces. The book unpicks why digital technology is such an inextricable part of modern society, first by examining the historical relationship between technological development and the early progression of human sociality. This is then followed by an examination of the ways in which modern life is currently being impacted by the expansion of digital information and devices into multiple aspects of our lives, including focuses on privacy, bias and ownership in digital spaces. Finally, it explores potential future

developments and their implications, and proposes that it is crucial to consider the design of technology and systems in order to support a positive and beneficial direction of change. Each chapter includes case studies, primarily drawn from The Creative Exchange, a five-year programme which ran from 2012 to 2016 to explore the notion of the digital public space through collaborative cross-sector research.

Federal Register Viva Publishing Network

From its inception as a public communication network, the Internet was regarded by many people as a potential means of escaping from the stranglehold of top-down, stage-managed politics. If hundreds of millions of people could be the producers as well as receivers of political messages, could that invigorate democracy? If political elites fail to respond to such energy, where will it leave them? In this short book, internationally renowned scholar of political communication, Stephen Coleman, argues that the best way to strengthen democracy is to re-invent it for the twenty-first century. Governments and global institutions have failed to seize the opportunity to

democratise their ways of operating, but online citizens are ahead of them, developing practices that could revolutionise the exercise of political power.

The traditional urban transportation systems around the globe are now being transferred into green public transportation systems in an effort to mitigate CO2 emissions and provide nature-friendly transportation systems in cities and, ultimately, to increase citizens' wellbeing. Furthermore, the cities are expected to transform their

traditional transportation systems to cutting-edge high technology green transportation systems in the near future due to regulations applied by the related authorities such as the EU and UN. At the same time, cities are undergoing a transformation from traditional to smart cities, which is an inevitable process due to swift developments in technologies and smart systems. Sustainable public transportation systems must be developed and adjusted to be applicable in future smart cities. The Handbook of Research on Promoting Sustainable Public Transportation Strategies in Urban Environments considers the challenges and advantages of sustainable public transportation systems in urban areas and provides relevant theoretical frameworks, the latest empirical research findings, and an overview of the latest technological developments on the subject. Covering key topics such as green vehicles, sustainability, and walkable cities, this major reference work is ideal for policymakers, government officials, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.
