When planning an industrial power supply plant, the specific requirements of the individual production process are decisive for the design and mode of operation of the network and for the selection and design and ratings of the operational equipment. Since the actual technical risks are often hidden in the profound and complex planning task, planning decisions should be taken after responsible and careful consideration because of their deep effects on supply quality and energy efficiency. This book is intended for engineers and technicians of the energy

industry, industrial companies and planning departments. It provides basic technical network and plant knowledge on planning, installation and operation of reliable and economic industrial networks. In addition, it facilitates training for students and graduates in this field. In an easy and comprehensible way, this book informs about solution competency gained in many years of experience. Moreover, it also offers planning recommendations and knowledge on standards and specifications, the use of which ensures that technical risks are avoided and that production and industrial processes can be carried out efficiently, reliably and with the highest quality.

Anyone who is an experienced digital photography student will tell you that more often than not, they are using their digital SLR camera away from their home or the classroom. And while they may feel like they've got the basics of their camera down, wouldn't it be nice for them to have some sort of a reference with to take when they're on the go? DAVID BUSCH'S COMPACT GUIDE FOR THE Canon EOS Rebel T2i/550D is a portable reference guide that goes beyond the standard field guide. Featuring both the basics - lists of controls, settings, and menu commands - and so much more, including depth-of-field tables, distance charts, and recommended settings for various shooting environments. With this guide on hand students can be confident in knowing they have all the information they need at their fingertips. They can just slip the book into your camera bag and go!

Design, Implementation and Operation of Industrial Networks John Wiley & Sons

Linear algebra occupies a central place in modern mathematics. This book provides a rigorous and thorough development of linear algebra at an advanced level, and is directed at graduate students and professional mathematicians. It approaches linear algebra from an algebraic point of view, but its selection of topics is governed not only for their importance in linear algebra itself, but also for their applications throughout mathematics. Students in algebra, analysis, and topology will find much of interest and use to them, and the careful treatment and breadth of subject matter will make this book a valuable reference for mathematicians throughout their professional lives. Topics treated in this book include: vector spaces and linear transformations; dimension counting and

applications; representation of linear transformations by matrices; duality; determinants and their uses; rational and especially Jordan canonical form; bilinear forms; inner product spaces; normal linear transformations and the spectral theorem; and an introduction to matrix groups as Lie groups. The book treats vector spaces in full generality, though it concentrates on the finite dimensional case. Also, it treats vector spaces over arbitrary fields, specializing to algebraically closed fields or to the fields of real and complex numbers as necessary.

The book is intended to help under- and postgraduate students and young scientists in the correct application of NMR to the solution of physico-chemical problems concerning the study of equilibria in solution. The first part of the book (Chapters 1 – 3) is a trivium, but should enable a student to design and conduct simple physico-chemical NMR experiments. The following chapters give illustrative material on the physico-chemical applications of NMR of

increasing complexity. These chapters include the problem of determination of equilibrium and rate constants in solution, the study of paramagnetism using NMR, the application of Dynamic NMR techniques and relaxation measurements. A multipurpose nonlinear regression program is supplied (on disc for PC) and is referred to throughout the book. Contents: NMR — Basic Principles Experimental Techniques Employed in NMR The Analysis of Experimental Data by Regression Techniques Studies of Equilibria in the Liquid State by NMR Spectroscopy Studies of Paramagnetism in Solutions by NMR Dynamic NMR and Nuclear Magnetic Relaxation Measurements Appendices Addendum: Encounter with NMR Instruments Readership: Students and researchers in analytical chemistry, inorganic chemistry and physical chemistry. keywords: NMR Spectroscopy; Practical FT NMR; Regression Methods; NMR Relaxation; Dynamic NMR; NMR of Paramagnetics; Physical Chemistry; Chemical Equilibrium; Chemical Kinetics; Solutions; Cements

This proceeding constitutes the thoroughly refereed proceedings of the 1st International Conference on Combinatorial and Optimization, ICCAP 2021, December 7-8, 2021. This event was organized by the group of Professors in Chennai. The Conference aims to provide the opportunities for informal conversations, have proven to be of great interest to other scientists and analysts employing these mathematical sciences in their professional work in business, industry, and government. The Conference continues to promote better understanding of the roles of modern applied mathematics, combinatorics, and computer science to acquaint the investigator in each of these areas with the various techniques and algorithms which are available to assist in his or her research. We selected 257 papers were carefully reviewed and selected from 741 submissions. The presentations covered multiple research fields like Computer Science, Artificial Intelligence, internet technology, smart health care etc., brought the discussion on how to shape optimization methods around human and social needs.
