Moral Theory: An Introduction explores some of the most historically important and currently debated moral theories about the nature of the right and good. Providing an introduction to moral theory that explains and critically examines the theories of such classical moral philosophers as Aristotle, Aquinas, Kant, Bentham, Mill, and Ross, this book acquaints students with the work of contemporary moral philosophers. All of the book's chapters have been revised in light of recent work in moral theory. The second edition includes a new chapter on ethical egoism, an extensively revised chapter on moral particularism, and expanded coverage of divine command

theory, moral relativism, and consequentialism. Additionally, this edition discusses recent work by moral psychologists that is making an impact on moral theory. [The Elements of Moral Philosophy](#) Cram101

What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the

complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

James Rachels's philosophical writings address key questions of contemporary life and the classic dilemmas of moral philosophy. A leading figure in the development of applied ethics, James Rachels became an influential and sometimes controversial thinker on issues concerning animal rights, euthanasia, bioethics, and moral objectivity. This final collection of James Rachels's work brings together fourteen essays that best summarize Rachels's philosophical positions. The essays also shed new light on the depth and breadth of Rachels's work and its importance for contemporary philosophy. Written in

Rachels's characteristically lucid, literary prose, these essays address the relationship between morality and reason, the duty to relieve both human and animal suffering, the independence of morality from religion, the rejection of relativism and egoism, and the role of ethics in a democratic society. Rachels offers an argument for vegetarianism, examines a controversial case involving a surrogate mother, and speculates on the ethics of political killing. Other essays range from Rachels's interpretation of Nietzsche's philosophy to his appreciation of movies. Rachels was a strong believer in the ability of moral philosophy to improve our lives. This collection, which brings these important works together for the first time, is a testament to both the value of moral philosophy in understanding our world and the richness of Rachels's contributions to this understanding.

"Moral philosophy is the study of what morality is

and what it requires of us. As Socrates said, it's about "how we ought to live"-and why. It would be helpful if we could begin with a simple, uncontroversial definition of what morality is. Unfortunately, we cannot. There are many rival theories, each expounding a different conception of what it means to live morally, and any definition that goes beyond Socrates's simple formula-tion is bound to offend at least one of them. This should make us cautious, but it need not paralyze us. In this chapter, I will describe the "minimum conception" of morality"--

"The author contends that one advantage of studying ethics is to lead the student to reflect on the nature of the motives by which he is habitually actuated, and the tendency of the course of conduct which he is daily pursuing. Another advantage of studying the science of ethics is the effect it has on the moral sensibility of the individual. Most men are willing to study the maxims which point out the path of virtue and happiness, if those maxims can be presented in connection with the reasons by which they are supported, and not as mere commands resting solely on the authority of God"--Introduction. Esteemed moral philosopher James Rachels

here collects fifteen essays, some classic

and others extensively revised, on the nature

and limits of moral reasoning. Rachels

argues that, rather than simply expressing

societal conventions, moral philosophy can

subvert received opinion and replace it with

something better. Combining a concern for

ethical theory with a discussion of practical

moral issues such as euthanasia, the rights

of animals, privacy, and affirmative action.

This Element defends a reading of Kant's

formulas of the moral law in Groundwork

of the Metaphysics of Morals. It disputes a

long tradition concerning what the first

formula (Universal Law/Law of Nature)

attempts to do. The Element also expounds

the Formulas of Humanity, Autonomy and

the Realm of Ends, arguing that it is only

the Formula of Humanity from which Kant

derives general duties, and that it is only the

third formula (Autonomy/Realm of Ends)

that represents a complete and definitive

statement of the moral principle as Kant

derives it in the Groundwork. The Element

also disputes the claim that the various

formulas are 'equivalent', arguing that this

claim is either false or else nonsensical

because it is grounded on a false premise

about what Kant thinks a moral principle is

for.
