This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons. It does not attempt to compete with the primers already on the market. Eminent international experts will edit, author, or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field. Each book will be practical, easy to use, and well referenced. Our aim is

for the series to encompass all of the health professions by focusing on specific professions, such as nursing, in individual volumes. However, integrated computing systems are only one tool for improving communication among members of the health care team. Therefore, it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange. This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship. Our joint values put people first. If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients, then our efforts will have succeeded.

- In the propulsive debut novel from the host of the #1 true crime podcast Crime Junkie, a journalist uncovers her hometown’s dark secrets when she becomes obsessed with the unsolved murder of her childhood neighbor—and the disappearance of another girl twenty years later. ONE OF THE BEST BOOKS OF THE YEAR: PopSugar You can’t ever know

for sure what happens behind closed doors. Everyone from Wakarusa, Indiana, remembers the infamous case of January Jacobs, who was discovered in a ditch hours after her family awoke to find her gone. Margot Davies was six at the time, the same age as January—and they were next-door neighbors. In the twenty years since, Margot has grown up, moved away, and become a big-city journalist. But she's always been haunted by the feeling that it could've been her. And the worst part is, January's killer has never been brought to justice. When Margot returns home to help care for her uncle after he is diagnosed with early-onset dementia, she feels like she's walked into a time capsule. Wakarusa is exactly how she remembers—genial, stifled, secretive. Then news breaks about five-year-old Natalie Clark from the next town over, who's gone missing under circumstances eerily similar to January's. With all the old feelings rushing back, Margot vows to find Natalie and to solve January's murder once and for all. But the police, Natalie's family, the townspeople—they all seem to be hiding something. And the deeper Margot digs into Natalie's disappearance, the more resistance she encounters, and the colder January's case feels. Could January's killer still be out there? Is it the same person who took Natalie? And what will it cost to finally discover what truly happened that night twenty years ago? Twisty, chilling, and intense, *All Good People Here* is a searing tale that asks: What are your neighbors capable of when they think no one is watching?

It's easy for us to trust God when life is going well. But when suffering comes, trusting God's goodness, his attentiveness to what's going on in the world, and his justice becomes far more difficult. In times of intense suffering, many of us ask, Why does God allow these things to happen? In the Bible, Job is known for facing intense personal suffering. Yet, upon closer examination, we find the book of Job is about more than just Job's calamities; it's a story about God and his relationship to Christ and his people in their suffering. In this helpful guide, Christopher Ash helps us explore the question, Where is God in

the midst of suffering? As we read, meditate, and pray through the book of Job, we will find assurance that God will be with us in Christ through every season and trial.

As a young boy, Aaron Rodgers played many sports, but football was his favorite. It wasn't until his freshman year in college that he was offered a scholarship from the University of California, where he played quarterback for three years, before declaring himself eligible for the NFL draft. He was picked by the Green Bay Packers in hopes of taking over the quarterback position, but it took three years before he would become their starting quarterback, and three more years to take the Packers to a winning Super Bowl championship and to be named the Super Bowl Most Valuable Player. Aaron is living proof that good things come to those who wait.

Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. “A powerful read that fills one with, dare I say . . . hope?” —The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE

There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the

proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. *All We Can Save* illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, this collection is a celebration of visionaries who are leading us on a path toward all we can save. How We Got to Now Lippincott Williams & Wilkins

Caring for your pastor and the difference it makes. Caring for your pastor and the difference it makes. What do you think about your pastor? Do you chew over his sermons and wonder if they are clear and helpful? Do you feel he spends enough time with you? In fact, do you ever catch yourself wondering what he does all day? The truth is, often we think, "What can my pastor do for me?" Far less often do we think, "What can I do for my pastor?" Seasoned former pastor, Christopher Ash, urges church members to think about pastors not just in terms of what they do € " how they lead and pray and preach and teach and so on € " but about who they are. He encourages us to remember that pastors are people and to pray for them as they serve us. Paradoxically, caring for our pastor will be a blessing to us as well as to them, and create a culture of true fellowship in our church family.
