An inspirati  
onal memoir  
about how  
Jennifer  
Pastiloff's  
years of  
waitressing  
taught her  
to seek out  
unexpected  
beauty, how  
hearing loss  
taught her  
to listen  
fiercely,  
how being  
vulnerable  
allowed her  
to find  
love, and  
how imperfec

tions can  
lead to a  
life full of  
wild  
happiness.  
Centered  
around the  
touchstone  
stories Jen  
tells in her  
popular  
workshops,  
On Being  
Human is the  
story of how  
a starved  
person grew  
into the  
exuberant  
woman she  
was meant to  
be all along  
by battling  
the demons  
within and  
winning. Jen  
did not  
intend to

become a yoga  
teacher, but  
when she was  
given the  
opportunity  
to host her  
own  
retreats,  
she left her  
thirteen-  
year  
waitressing  
job and said  
"yes,"  
despite  
crippling  
fears of her  
inexperience  
and her own  
potential.  
After years  
of feeling  
depressed,  
anxious, and  
hopeless, in  
a life that  
seemed to  
have no

escape, she  
healed her  
own heart by  
caring for  
others. She  
has learned  
to fiercely  
listen  
despite  
being nearly  
deaf, to  
banish shame  
attached to  
a body mass  
index, and  
to rebuild a  
family after  
the  
debilitating  
loss of her  
father when  
she was  
eight.  
Through her  
journey, Jen  
conveys the  
experience  
most of us

are missing  
in our  
lives: being  
heard and  
being told,  
"I got you."  
Exuberant,  
triumphantly  
messy, and  
brave, On  
Being Human  
is a  
celebration  
of happiness  
and self-  
realization  
over  
darkness and  
doubt. Her  
complicated  
yet  
imperfectly  
perfect life  
path is an  
inspiration  
to live  
outside the  
box and to

reject the al  
l-too-common  
belief of "I  
am not  
enough." Jen  
will help  
readers  
find,  
accept, and  
embrace  
their own vu

bravery, and  
humanness.

collaboration between a biblical scholar (Mary Ann Beavis) and a practical theologian (HyeRan Kim-Cragg) who are concerned with the way that the Bible is portrayed and interpreted in popular culture, including but not limited to the movies. This concern points to a need for a conversation, examining what the Bible actually says, in order to uncover transformations and distortions of the biblical stories in the wider culture--including Christian culture. Our conversation is counter-cultural, not in an oppositional way, but taking an

alternative posture that aims to provide different insights by drawing from and closely looking at the Bible. The chapters take a Christian canonical approach, articulating "what the Bible says" (and doesn't say) with regard to culturally pervasive themes such as sin and salvation, Christ and Antichrist, heaven and hell, in contrast to popular understandings as disseminated in (primarily) film, advertising, television, etc. We hope that together we will open up fertile academic, ecclesial, and secular space for disclosing loaded cultural and ideological views

towards offering positive and intriguing insights embedded in the Bible. From "a formidably gifted writer" (The New York Times Book Review), a book that asks: Is there life after the internet? As this urgent, genre-defying book opens, a woman who has recently been elevated to prominence for her social media posts travels around the world to meet her adoring fans. She is overwhelmed by navigating the new language and etiquette of what

she terms "the portal," where she grapples with an unshakable conviction that a vast chorus of voices is now dictating her thoughts. When existential threats--from climate change and economic precariousness to the rise of an unnamed dictator and an epidemic of loneliness--begin to loom, she posts her way deeper into the portal's void. An avalanche of images, details, and references accumulate to form a landscape that is post-sense, post-irony, post-everything. "Are we in hell?" the people of the

portal ask themselves. "Are we all just going to keep doing this until we die?" Suddenly, two texts from her mother pierce the fray: "Something has gone wrong," and "How soon can you get here?" As real life and its stakes collide with the increasingly absurd antics of the portal, the woman confronts a world that seems to contain both an abundance of proof that there is goodness, empathy, and justice in the universe, and a deluge of evidence to the contrary. Fragmentary and omniscient, incisive and

sincere, No One Is Talking About This is at once a love letter to the endless scroll and a profound, modern meditation on love, language, and human connection from a singular voice in American literature.

A trailblazing exploration of the poetic power of popular songs, from Tin Pan Alley to the Beatles to Beyoncé and beyond.

Encompassing a century of recorded music, this pathbreaking book reveals the poetic artistry of popular songs. Pop songs are music first. They also comprise the most

widely disseminated poetic expression of our time. Adam Bradley traces the song lyric across musical genres from early twentieth-century Delta blues to mid-century rock 'n' roll to today's hits.

George and Ira Gershwin's "Fascinating Rhythm." The Rolling Stones' "(I Can't Get No) Satisfaction." Rihanna's "Diamonds." These songs are united in their exacting attention to the craft of language and sound. Bradley shows that pop music is a poetry that must be heard more than read, uncovering the rhythms, rhymes, and metaphors expressed in the singing voice.

At once a work of musical interpretation, cultural analysis,

literary criticism, and personal storytelling, this book illustrates how words and music come together to produce compelling poetry, often where we least expect it.

From hospitals and prisons to schools and corporations: no

matter how large or seemingly abstract, all institutions are ultimately the result

of the actions and interactions of people. In this original and innovative text, Gibson and Vom Lehn show the

different ways in which studying people's own meaning-making practices can help us understand the role of institutions in contemporary society. Institutions,

Interaction and Social Theory takes the reader through the core conceptual foundations of Symbolic Interactionism, Ethnomethodology and Conversation Analysis. Engaging with a rich tradition in sociological thought, it suggests that interactionist perspectives have remained largely absent in the study of institutions, and how they contrast with and contribute to the broader field of research in institutional contexts. With chapters on healthcare, education, markets, and art and culture, this text will be of interest to those studying institutions, organisations and work in sociology and in business schools. It will also be valuable

for students of social theory interested in interactionism, and in the challenges and opportunities of connecting complex theoretical discussions to real world examples. *Of Human Bondage* Lulu.com As Charles Darwin suggested more than a century ago, the differences between animals and humans are “of degree and not of kind.” Not long ago, ethologists denied that animals had emotions or true intelligence. Now, we know that rats laugh when tickled, magpies

mourn as they cover the departed with greenery, female whales travel thousands of miles for annual reunions with their gal pals, seals navigate by the stars, bears hum when happy, and crows slide down snowy rooftops for fun. In engaging text, photographs, and infographics, *Inside Animal Hearts and Minds* showcases fascinating and heart-warming examples of animal emotion and cognition that will foster wonder and empathy. Learn about an orangutan who

does “macramé,” monkeys that understand the concept of money, and rats that choose friendship over food. Even language, math, and logic are no longer exclusive to humans. Prairie dogs have their own complex vocabularies to describe human intruders, parrots name their chicks, sea lions appear capable of deductive thinking akin to a ten-year-old child’s, and bears, lemurs, parrots, and other animals demonstrate numerical cognition. In a

world where a growing body of scientific research is closing the gap between the human and non-human, *Inside Animal Hearts and Minds* invites us to change the way we view animals, the world, and our place in it. **Where Did I Come From?** Macmillan Lowndes, a communication specialist gives us 92 tips to help you become a master in communicating. The Invisibles, The Filth, We3--as well as for his acclaimed serialized comics--JLA, Superman, Batman, New X-Men--Grant Morrison has radically redefined the superhero archetype. Known for his eccentric lifestyle and as a practitioner of "pop magic," Morrison sees the superhero as not merely fantasy but a medium for imagining a better humanity. Drawing on a variety of analytical approaches, this first-ever collection of critical essays on his work explores his rejuvenation of the figure of the superhero as a

Of *Human Bondage* is the first and most autobiographical of Maugham's novels. It is the story of Philip Carey, an orphan eager for life, love and adventure. After a few months studying in Heidelberg, and a brief spell in Paris as a would-be artist, Philip settles in London to train as a doctor. And that is where he meets Mildred, the loud but irresistible waitress with whom he plunges into a formative, tortured and masochistic

affair which very nearly ruins him. *How Forests Think* D.E.

Hardesty This book focuses on the reporting of human rights in broadly defined times of conflict. It brings together scholarly and professional perspectives on the role of the media in constructing human rights and peacebuilding options in conflict and post-conflict environments, drawing on case studies from Europe, Latin America, the Middle East, Africa, and South

Asia. It also provides critical reflections on the challenges faced by journalists and explores the implications of constructing human rights and peacebuilding options in their day-to-day professional activities. The chapters embrace a variety of theoretical, empirical and methodological approaches and will benefit students, scholars and media professionals alike. *How to Talk to Anyone* Lulu.com To make sense of the world, we're always trying to place things in context, whether

our environment is physical, cultural, or something else altogether. Now that we live among digital, always-networked products, apps, and places, context is more complicated than ever—starting with "where" and "who" we are. This practical, insightful book provides a powerful toolset to help information architects, UX professionals, and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create. You'll discover not only how to design for a given context, but also how design participates in making context. Learn how people perceive context when

Against this background, Heinrichsmeier presents the results of her two-year sociolinguistic study examining how a group of older women of different ages negotiated their way through their own and others' expectations of ageing and constructed different kinds of older – and other – identities for themselves. Through vivid and nuanced analysis of their chat and practices in a small village hair salon, Heinrichsmeier reveals these women's subtle and skilful manipulation of stereotypes of ageing and the impact of the evolving talk on their identity constructions. Her study, which provides numerous short extracts of talk in both the hair salon and interview along with more detailed case studies, highlights the importance of such apparently 'trivial' sites – for both studying older people's identity work and as loci for positive identity constructions and well-being in later life. This book will be of particular

interest to graduate students and scholars working in sociolinguistics, discourse analysis, conversation analysis, and gerontological studies, as well as those interested in approaches integrating ethnography and language.

Mastering Fear analyzes horror as play and examines what functions horror has and why it is adaptive and beneficial for audiences. It takes a biocultural approach, and

focusing on emotions, gender, and play, it argues we play with fiction horror. In horror we engage not only with the negative emotions of fear and disgust, but with a wide range of emotions, both positive and negative. The book lays out a new theory of horror and analyzes female protagonists in contemporary horror from child to teen, adult, middle age, and old age. Since the turn of the millennium, we have seen a new generation of female protagonists in horror. There are feisty teens in *The Vampire Diaries* (2009–2017),

troubled mothers in *The Babadook* (2014), and struggling women in the New French extremity with *Martyrs* (2008) and *Inside* (2007). At the fuzzy edges of the genre are dramas like *Pan's Labyrinth* (2006) and *Black Swan* (2010), and middle-age women are now protagonists with Carol in *The Walking Dead* (2010–) and Jessica Lange's characters in *American Horror Story* (2011–). Horror is not just for men, but also for women, and not just for the young, but for audiences of all ages.

*If Our Bodies Could Talk* Rowman & Littlefield  
Can forests think? Do dogs dream? In this astonishing book, Eduardo Kohn challenges the very foundations of anthropology, calling into question our central assumptions about what it means to be human—and thus distinct from all other life forms. Based on four years of fieldwork among

---

the Runa of Ecuador's Upper Amazon, Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world's most complex ecosystems. Whether or not we recognize it, our anthropological tools hinge on those capacities that make us distinctly human. However, when we turn our ethnographic attention to how we relate to other kinds of beings, these tools (which have the effect of

divorcing us from the rest of the world) break down. How Forests Think seizes on this breakdown as an opportunity. Avoiding reductionistic solutions, and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin, this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself. In this groundbreaking work, Kohn takes

anthropology in a new and exciting direction—one that offers a more capacious way to think about the world we share with other kinds of beings.

Learn to find the happiness that is natural to you, and enjoy better relationships, better health, more success and a longer life. The peculiar thing about us humans is, we spend a lot of time working to find people and things that will make us happy. In fact, we seem to spend the majority

---

of our time doing this. However, there is no guarantee that any of this effort will work. There are lots of people who have hordes of people around them, and who have lots of things, but have been unable to make themselves happy. The truth is, happiness can be had with little effort. Have you ever been happy for no reason at all? Of course you have. Without anything changing in life, happiness just appears. We see it in young children all the time. In fact, we

expect to see it in children. If you happen to ask a smiling child why he or she is so happy, at best the answer may be, "Because." For an adult this may be an unsatisfying answer, but for the child it is the truth -- happiness exists "just because." As we age we seem to lose touch with happiness-for-no-reason-at-all. We see a world where everyone is striving for stuff, striving for popularity, striving, striving, striving. The natural fount of happiness we once enjoyed disappears

as we join them. However, that happiness is not gone. All that happened is we lost our connection to it. This book is about recovering that connection. We all grow up believing that if we work hard, and if we are good people, we will enjoy good relationships with others, good health, success and a long life. Obviously this is not true. There are a lot of rich old people who are not happy. What we have, what we do, and the other circumstances of our lives do not

---

provide authentic happiness. Instead, happiness comes from inside of us, and all by itself enables us to have secure relationships, good health, more success and longer lives. So, what is the secret of being happy? Being happy is a little like flipping a switch. When it's on you are happy and when it's off you are not. It's so easy. How else can you explain being happy for no reason. What you need to do is learn to turn it on, and keep it turned on. This book discusses seven

practices that help you do that. There is a lot of wisdom available about how to be happy. Most of it is thousands of years old, but some is quite new. The seven practices we will look at incorporate this wisdom to help you learn how to turn on happiness in your life. This kind of happiness does not require changing anything in your life. All you have to do is learn to turn it on. *What Does the Bible Say?* Anchor This volume presents the first global history of human rights

politics in the age of decolonization. The conflict between independence movements and colonial powers shaped the global human rights order that emerged after the Second World War. It was also critical to the genesis of contemporary human rights organizations and humanitarian movements. Anti-colonial forces mobilized human rights and other rights language in their campaigns for self-determination. In response, European empires harnessed the new international politics of human rights for their own ends,

---

claiming that their  
rule, with its  
promise of  
'development,' was  
the authentic vehicle  
for realizing them.  
Ranging from the  
postwar partitions  
and the wars of  
independence to  
Indigenous rights  
activism and post-  
colonial memory,  
this volume offers  
new insights into the  
history and legacies  
of human rights, self-  
determination, and  
empire to the  
present day.
