Mobile Crane Manual Butterworth-Heinemann

Crane Handbook offers extensive advice on how to properly handle a crane. The handbook highlights various safety requirements and rules. The aim of the book is to improve the readers' crane operating skills, which could eventually make the book a standard working guide for training operators. The handbook first reminds the readers that the machine should be carefully tested by a regulatory board before use. The text then notes that choosing the right crane for a particular job is vital and explains why this is the case. It then discusses how well-equipped and durable the crane should be. The next chapters talk about the crane's operating controls; each control is identified and explained. The book lists the requirements that the crane must meet, while the final chapters explore proper set-up, maintenance, and precautions. The text is a very helpful reference for crane operators, owners, and contractors and could be of interest to casual readers as well.

Crane Operator's Manual International Pub & Training Limited

For instructors of non-sport martial training, this Master's Manual details 340 duan chuan fa or "Short Fist" extremely aggressive and terminal close range fighting techniques, maneuvers and strategies against specific aggressions. As this is oriented toward seasoned instructors, no photos are included, nor are they necessary with the detailed written directions. This is not "self defense" material: that is not its genesis and it is patently inappropriate for those who do not train seriously. The techniques present combinations of throws, locks, breaks, holds, chops, kicks, punches and other strikes arranged in 11 levels of belt ranks up to 5th Black, as presently used in the Chuan Fa Kenpo system. Each technique will easily suggest 10 optional and equally effective maneuvers, i.e. these are "seeds" for dynamic, adaptive responses. There has been a deliberate attempt in the Manual's layout to allow room for you to leave tracks as you modify these seminal maneuvers.
