The Talon is a mid-size, two axis repeatable remote head. It has a wide variety of operating modes: manual operation from joystick, optional hand wheels or pan bars control, motion control style record and playback, " go to mark " preset framing, intervalometer operation and can operate as a slave to Kuper Node motion control.

How to win at E Claw machines - Tips and tricks! | The Crane Couple

TALON systems use centrifugal force to adjust the pitch angle of the three blades to regulate the RPM. It is a self adaptive process. When the rotor is static, the pitch angle is about 10 degrees. As the RPMs go higher, the centrifugal force becomes greater and starts to push the blades to reduce the pitch angle to slow down the rotor.
