It is the story of several generations of descendants of African slaves, brought by English merchants to the island of Barbados, in the West Indies, on the new continent. The narrative shows the hardships it was to live on the plantation. Once free, Benjamin, a son, had dreams of one day leaving the island to see other parts of the world. He got an opportunity to work in the isthmus of Panama, to help build the interoceanic canal. This story narrates his journey and what happened when he got there.

A Financial Times Best Book of 2017 "A shrewd and knowing book." –Robert D. Kaplan, The Wall Street Journal "A compelling and impressive read." –The Economist "Skillfully crafted and well-argued." –Jeffrey Wasserstrom, Financial Times "An excellent modern history. . . . provides the context needed to make sense of the region's present and future." –Joyce Lau, South China Morning Post A history of the combative military, diplomatic, and economic relations among China, Japan, and the United States since the 1970s—and the potential crisis that awaits them Richard McGregor's Asia's Reckoning is a compelling account of the widening geopolitical cracks in a region that has flourished under an American security umbrella for more than half a century. The toxic rivalry between China and Japan, two Asian giants consumed with endless history wars and ruled by entrenched political dynasties, is threatening to upend the peace underwritten by Pax Americana since World War II. Combined with Donald Trump's disdain for America's old alliances and China's own regional ambitions, east Asia is entering a new era of instability and conflict. If the United States laid the postwar foundations for modern Asia, now the anchor of the global economy, Asia's Reckoning reveals how that structure is falling apart. With unrivaled access to archives in the United States and Asia, as well as to many of the major players in all three countries, Richard McGregor has written a tale that blends the tectonic shifts in diplomacy with bitter domestic politics and the personalities driving them. It is a story not only of an overstretched America, but also of the rise and fall and rise of the great powers of Asia. The about-turn of Japan—from a colossus seemingly poised for world domination to a nation in inexorable decline in the space of two decades—has few parallels in modern history, as does the rapid rise of China—a country whose military is now larger than those of Japan, South Korea, Taiwan and southeast Asia's combined. The confrontational course on which China and Japan are set is no simple spat between neighbors: the United States would be involved on the side of Japan in any military conflict between the two countries. The fallout would be an economic tsunami, affecting manufacturing centers, trade routes, and political capitals on every continent. Richard McGregor's book takes us behind the headlines of his years reporting as the Financial Times's Beijing and Washington bureau chief to show how American power will stand or fall on its ability to hold its ground in Asia.

Is there a hidden, powerful secret to becoming more creative and finding success with your work? Did creative masters like Wolfgang Amadeus Mozart and Henri Matisse possess an abundance of talent the rest of us can only dream of? This book is the third in a three-part series about the Power of Creativity for new writers, musicians, filmmakers, artists. It's for anyone who has a great idea (or even just a little one) but they're finding it difficult to act on their idea, do deep work and finish their most important creative projects. In this book, you will discover these strategies: 1. Immerse Yourself in Your Work There's a mindset successful creative people adopt too. Call it flow, call it a fugue, call it total immersion: I'll show you how creative masters turn on and off this mindset at will and how you can do the same. 2. Seek Out Solitude Extroverts thrive when working in the company of others, but many writers, musicians, painters and artists do their best work alone. So how can you create alone and still feel positive about your work and the self? 3. Be Obsessed It takes a level of focus and even obsession to see a creative project (like writing a book or composing an album) from beginning to end. If you're alarmed, know that obsession is something you can embrace rather than fear with the right approach. 4. Root Out Perfectionism Like a Weed Perfectionism is a nasty weed that could be choking the life out of your ideas. I'll guide you through the types of perfectionism to watch out for and then root them out. 5. Practice Your Craft Deliberately What is deliberate practice? It's not enough to just practice writing, drawing or painting every day. You must be smart about the techniques you use for learning, practicing and problem solving. 6. Cut the Cord For every creative person, there comes a time when you must focus on what's important, commit to doing the work and cut the rope. In this personal story, I explain what this looks like 7. Fall Forwards Making messy mistakes is part of the creative process. The trick is to getting positive results is to test your ideas sooner and learn from your mistakes. If you want to discover how to conquer procrastination, finish your work and find success, download a sample or buy now.
