(Chu) Tao-sheng stands out in history as a unique and preeminent thinker whose paradigmatic, original ideas paved the way for the advent of Chinese Buddhism. The universality of Buddha-nature, which Tao-sheng championed at the cost of excommunication, was to become a cornerstone of the Chinese Buddhist ideology. This book presents a comprehensive study of the only complete document by Tao-sheng still in existence.

"Tobacco has been pervasive in China almost since its introduction from the Americas in the mid-sixteenth century. One-

third of the world's smokers--over 350 million--now live in China, and they account for 25 percent of worldwide smoking-related deaths. This book examines the deep roots of China's contemporary "cigarette culture" and smoking epidemic and provides one of the first comprehensive histories of Chinese consumption in global and comparative perspective"--Publisher's description.

"This is Thomas Cleary's translation of two classic Chinese books describing the essential philosophy and practice of Tao, written long ago as maps of the Way: Tao Te Ching and Chuang-tzu. Cleary's bold new translations restore, as no other translations have yet done, the remarkable power and mind-opening distinctiveness of the original Chinese." "Composed in China over two thousand years ago and widely regarded as classics of world literature as well as honored for their practical wisdom, the Tao Te Ching and Chuang-tzu cover a wide range of subjects, from politics and economy to psychology and mysticism, from strategies for managing stress and maintaining health to ways to strengthen one's consciousness in a turbulent world." "Together,

these texts present the philosophical and practical core of classical Taoism while making Taoism's teachings more accessible than ever before to the western reader." "Few of the world's great books," writes Cleary in his Introduction, "have achieved the perennial currency of these writings. Countless readers have found endless fascination and enlightenment in the pregnant aphorisms and fantastic allegories of these ancient classics. Over the centuries the Tao Te Ching in particular has inspired many social and spiritual movements as well as a vast body of exegetical literature." "At one time, state colleges of mysticism were established by the Chinese government for the study of the philosophy of the Tao Te Ching, and individuals who had mastered it were sought as advisers by people of all classes, from emperors to peasants. Even when the Taoist canon was torched by order of the Mongol ruler of China in 1280, the Tao Te Ching alone was spared destruction."

"Here is wonderful, insightful reading, richly enhanced by Cleary's introduction and commentary."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

A new translation based on the Silk Texts A & B unearthed from the Han tombs near Changsha, Hunan Province in China in the year 1973, proved by authorities in ancient Chinese studies to be the most authentic texts of Lao Tzu so far. Late Prof. Huang, a former senior professor at Peking University, Beijing, China, has corrected a vast amount of errors resulting from textual corruption of the various prevalent versions of Lao Tzu that have been passed down to us through the ages. A result of over twelve years of painstaking research and meditation, Professor Huang has created a work that promises to be widely acclaimed and become a standard reference on the subject.

"Lao Tzu's Tao Te Ching is not only the single most
important text in Chinese spirituality, it is probably
the most influential spiritual text in human history. In
the past, virtually all translations of this text have
been produced either by sinologists having little
poetic facility in English, or writers having no ability
to read the original Chinese. David Hinton's fluency in
ancient Chinese and his award-winning poetic ability

combine both of these essential qualifications.

Together, they allow a breathtaking new translation
that reveals how remarkably current and even
innovative this text is after 2500 years. This volume
is the last in a series of translations presenting the
four central masterworks of ancient Chinese thought :
Tao Te Ching, Chuang Tzu, The Analects, and
Mencius."--Back cover.

Recent years have seen a dramatic growth of natural language
text data, including web pages, news articles, scientific
literature, emails, enterprise documents, and social media such
as blog articles, forum posts, product reviews, and tweets.

This has led to an increasing demand for powerful software
tools to help people analyze and manage vast amounts of text
data effectively and efficiently. Unlike data generated by a
computer system or sensors, text data are usually generated
directly by humans, and are accompanied by semantically rich
content. As such, text data are especially valuable for
discovering knowledge about human opinions and preferences,
in addition to many other kinds of knowledge that we encode in
text. In contrast to structured data, which conform to well-
defined schemas (thus are relatively easy for computers to
handle), text has less explicit structure, requiring computer
processing toward understanding of the content encoded in
text. The current technology of natural language processing
has not yet reached a point to enable a computer to precisely
understand natural language text, but a wide range of
statistical and heuristic approaches to analysis and
management of text data have been developed over the past
few decades. They are usually very robust and can be applied

to analyze and manage text data in any natural language, and about any topic. This book provides a systematic introduction to all these approaches, with an emphasis on covering the most useful knowledge and skills required to build a variety of practically useful text information systems. The focus is on text mining applications that can help users analyze patterns in text data to extract and reveal useful knowledge. Information retrieval systems, including search engines and recommender systems, are also covered as supporting technology for text mining applications. The book covers the major concepts, techniques, and ideas in text data mining and information retrieval from a practical viewpoint, and includes many hands-on exercises designed with a companion software toolkit (i.e., MeTA) to help readers learn how to apply techniques of text mining and information retrieval to real-world text data and how to experiment with and improve some of the algorithms for interesting application tasks. The book can be used as a textbook for a computer science undergraduate course or a reference book for practitioners working on relevant problems in analyzing and managing text data.

In this new translation and commentary, LaFargue interprets the concept of Tao in the Tao Te Ching as a spiritual state of mind cultivated in a particular school in ancient China a state of mind which also expressed itself in a simple but satisfying life-style, and in a low-key but effective style of political leadership. The interpretation offered here is not only historically accurate, but also conveys the spiritual depth of the Tao Te Ching and its contemporary relevance. The translation is made transparent by a design that presents all of the commentary on the page facing the relevant text.
